

June 22, 1990

This is small collection of icons that I created using Icondraw V1.0. by Phil Eskelin.

If you are using Icondraw you know that Phil had some problems with his first version. As a result some of these icons may not display properly when you attempt to "CHANGE ICON." Phil has assured me that this problem will be taken care of in the next version. The icons, however, are good and you can view them using the draw program. With a little work, eventually each icon displays properly. (TIP: Change the icon a number of times until it displays cleanly).

Listing of ICONS and what they are used for.

12MEG.ICO 5 1/4" floppy with 1.2 Meg label
144MEG.ICO 3 1/2" mini disk with HD label
360K.ICO 5 1/4" floppy with 360K label
