

QwikDRAW! v1.2 for Windows v3.1

Users Guide

QwikDRAW! adds an icon box containing 29 icons to Corel Draw v3.0. The icons are all shortcuts for commands in Corel Draw. This way you don't have to remember what menu a particular function is in or what keyboard shortcut to use. This icon box floats above Corel Draw so that you can still work on your drawing at all times.

Start QwikDRAW! by double clicking on its modified balloon icon. This will also start Corel Draw v3.0 if it is not already running. After everything is loaded, drag your mouse over the balloon icon at the bottom of the other tools in the toolbox on the left of your screen. This will cause the icon box to appear. It will continue floating until you click on the Close Icon Box icon or Exit. Single clicking on the balloon icon will send it behind the current application (i.e., you won't be able to see it at all). In clicking on it you will activate the icon box. Just click Close Icon Box and everything will be hidden should you be working in other applications. Double clicking on the balloon icon will bring it back on top of everything.

About QwikDRAW!

QwikDRAW! was written in Microsoft's Visual BASIC v2.0 Professional Version.

Microsoft Windows v3.1 or higher and Corel Draw v3.0 are required to use this program.

It requires the file VBRUN200.DLL in your \WINDOWS\SYSTEM directory.

QWIKDRAW.EXE can be placed anywhere you wish.

VBRUN200.DLL can currently be found on Compuserve in MSBASIC, Library 5, as VBRUN2.ZIP for those who don't already have a copy. As I cannot control Compuserve, I cannot guarantee that VBRUN2.ZIP can be found there. It can also be found on many BBSs across the country. All distributions of this program will contain the other files mentioned. Some distributions of this program will have the file included in the main ZIP file or on the diskette. Because the VBRUN file is over 200K, I would prefer to not include it for those users who may already have it. This will save considerably on their connect and/or long distance charges.

QwikDRAW! is not "free software." It is being distributed as shareware. Please register your copy by following the registration instructions. You are granted a thirty day trial period. If at the end of thirty days you continue to use QwikDRAW!, you are expected to register!

QwikDRAW! Registration

To register your copy of QwikDRAW! please send \$15 to Smart Typesetting. I've spent numerous hours developing this software to help make using Corel Draw v3.0 faster and easier. You can show your appreciation by registering as soon as possible. Registered users will be provided with telephone support and their feedback on features for future releases will weigh heavily in the development process. Please encourage your friends to purchase their own copy.

Smart Typesetting
6835 E. Phelps Rd.
Scottsdale, AZ 85254-1539
(602) 443-3282

Note: Registered users of v1.0 or v1.01 need not re-register. Many of the current changes were at your request. Please continue to provide me with feedback as it is much appreciated.

If you would like a copy of the latest version of QwikDRAW!, color printed icon cheat sheet and other utilities developed by Smart Typesetting, include an additional \$5 to cover shipping and handling.

If you should have any problems with QwikDRAW!, please let Smart Typesetting know about it so that a fix can be developed.

If you would like to see a particular feature added to QwikDRAW! in the future, please let us know as we will be constantly working on new and improved versions. I will be compiling a list of icons that users would like to see added and I would also like to get a list of those icons that you never use. I would like to expand the number of icons in a future version. I am open to any and all suggestions.

Address all problems and feature requests to the above mailing address or Compuserve address 70274,3072. I will reply promptly.

Please fully understand that there are no warranties, promises or guarantees that QwikDRAW! will do anything other than take up good disk space.
