

Welcome to Heritage Books Archives:

Prince George's County Maryland Genealogical Society Bulletin, Vols. 1-30

This CD-ROM includes electronic reprints of the first thirty volumes of the monthly bulletin published by the Prince George's County, Maryland, Genealogical Society. This bulletin contains a wide range of material from announcements of Society meetings and library acquisitions to how-to articles and record abstracts. While the former two categories are only of passing interest, the latter two are of great value to researchers interested in this county; with the publication of this CD, this mass of research materials is now readily accessible to genealogists.

The Prince George's County records included in this periodical include birth, marriage, and death records, great numbers of family Bibles, numerous cemetery inscriptions, brief family histories, church records, slave manumissions, wills, material on Revolutionary War soldiers, lists of residents who moved west, newspaper extracts, naturalizations, guardianship accounts, hospital registrations, and voter and juror lists. In addition there are how-to articles on a wide range of subjects relevant to the county, listings of members researching county families, and the ubiquitous queries.

The books are presented as graphic images, so the user sees the works just as they were originally published. They are intended to look and function very much like "real" books. An electronic index to the names of people and places has been prepared for this electronic edition. In addition, the human generated name indexes originally published with most volumes of the periodical have been retained; we strongly advise researchers to use both the electronic and the human-generated indexes (where available) to achieve the most complete searches possible – browsing in a human generated index will often turn up unexpected name variations, for example. In order to further enhance the usability of this resource, the electronic bookmarks seen at the left provide links to each volume listed. By returning to the Welcome Page or How to File and clicking the bookmark, the user can navigate from volume to volume.

Please read the short article "**How to Read These Electronic Books**" by clicking on the "**How To**" bookmark at the left. That article explains the essential features of the viewer, how to access the books readily, and how to make the most effective use of the electronic search engine.

Thank you for choosing Heritage Books. Good luck in your research!
