Please notice that all our CD-products are for PC only. Up to now we have developed 4 Interactive XXX games and 2 Hardcore picture CD's.

1. Private Investigator, an Interactive XXX adventure

*Winner of the 1996 AMEE award for Best Erotic Arcade Style game.
(Adult Multimedia Excellence in Entertainment - November 22, Las Vegas - USA).*

Private Investigator is a CD-ROM that is something different from all the rest. Something very special. Something very fun-to-play.

What is **PRIVATE INVESTIGATOR** ?

Private Investigator is the newest CD-ROM production of Image Line, the makers of Private PornMania and Private Prison.

It is a special Hard-core Erotic CD-ROM, unique in its kind, as it incorporates some new technology that gives people a click-and-response CD instead of a click-and-wait system.

This **Private Investigator** CD-ROM offers you :

a virtual 360° 3D-rendered office where you can walk around freely and use almost every object in this office
full screen and truly Interactive 'Play-with-a-girl' session with custom made blue-screen shots (watch her doing whatever you want her to do !)
a unique Sex-Jump-and-Shoot Arcade platform game with smooth moving sprites and up to 15 levels of fun (each in three difficulty levels). Incorporates also :
* interactive fucking to make hookers come
* fighting against big NBA players and mean karate kids
* avoiding 'wheelchair-ing' Grannies
Extra game levels will be available on Private's Internet WEB site. Check it out !
a joke telling moose with over 1500 jokes (about sex, blondes, lawyers, etc.)
a quoting skeleton with over 300 quotes of some very famous people (helps you to keep up your bar appearance)
and, of course, lots of Sex and fun things to do...

What is the story all about ?

Well, you are Dick Slammer, the famous Private Investigator, who became (without ever wanting it) a specialist in Adultery cases !
So on one of those days, you come in to your 360° 3D-rendered office, and wonder around what that day will bring to you.
You try to have a good laugh with the joke telling moose in your office or you want to keep up your bar-appearance by one of the quotes of the skeleton. Perhaps you feel more for a zap through the different Sex Movie Channels each with a lot of hard-core Sex. Perhaps you just pick up your telephone and listen to some telephone sex. Or you could use your PC for what a PC is used the most : i.e. playing some Sex games and viewing nasty pictures.

But you are not going to do this right now, because Nancy just entered your office. Again, a classic case of adultery !
This time, you really feel sorry for this sensual and sexual attractive girl, and you want to help her. But you won't do it for the money, because if you succeed Nancy will reward you with her body !
She has already gone to your bedroom and she is impatiently waiting for you to come and play with her.
Now, let's find that bastard cheating on his wife. You walk out the office and take your chopper to fly (3D-rendered) to one of the 15 different levels.
It is here that starts the Sex-Jump-and-Shoot Arcade game.
You need to find her husband and put it all on tape. But where the hell are you going to find a camera and video tapes and keys to open doors and ...

Well, just manage your way through the different levels (each level can be played in three different difficulty levels : Easy - Medium - Hard) and :

- fight against impressive NBA players (have you ever been dunked ? It is not a nice experience)
- fight the mean, lean karate kids
- avoid the grannies driving around in there wheelchairs

- but, most of all, interactively fuck the hookers and make them come. You have to fuck them in a lot of different positions. Some of them she likes, others not. If you manage to make her come you sometimes get rewarded with keys, guns, bullets, video tapes, camera etc. All those things you need to solve this case.
- find new extra levels on Private's Internet WEB site.

The **game levels** can be played in different Windows modes.

Either you can play them Windowed (resolution 160*100, 320*200, 640*400, Any resolution in between or full screen - to choose from depending on your PC system), or you play it Full Screen (DISPDIB format - the fastest mode).

Once succeeded, you get back to the office and Nancy is waiting to reward you with her body. You enter the bedroom and you come into a Full-Screen, truly Interactive 'Play-with-Nancy'-session !

Undress her, play with her, turn her around and let her play with her love tools. Use your magnifier lens to get a closer look and enjoy it all again afterwards by watching it on video tape.

You will need all your imagination to please Nancy.

And this goes over and over again, 15 different levels (each in three difficulty levels) and hours of fun to play ! For those who play all levels, a nice extra reward is waiting for you. What reward ? Well play all levels and find it out yourself !

The CD comes with a nice Set-up program which gives you set-up possibilities for Audio channels, Gamma correction (screen), difficulty levels, screen scrolling methods (if you are used to some methods, then adapt it the same way), Arcade frame-rate (depending on your system and graphical video board - you will be limited in your possibilities), etc....

This may all seem very technical but it offers you a possibility to get the game running even on less performant systems, which is better than not running at all !

A menu & slide-show of the other products completes this CD-ROM.

This CD is available in 4 different languages : French / Spanish / Portuguese / English

2. Private PornTris

PRIVATE PORNTRIS CD-ROM installs easily. Just put it in your CD-ROM drive and choose under Windows 3.1 'File-Run' and type : '<your CD Drive>:INSTALL'.

The brief installation procedure just creates a Windows Group with the different icons of this PRIVATE PORNTRIS CD. Except of one INI file and one sound file, no files are copied on your Hard disc.

For Windows 95, just insert the CD in the drive.

At the start-up of this PRIVATE PORNTRIS, you are presented with a menu system.

To start PRIVATE PORNTRIS you are asked for a password. As this CD contains adult content we have decided to password protect it.

At the Private Porntris Setup you can choose for background music and sound effects. There are four different 'Overall Image Quality' settings from which you can choose. If you have a real power system, just pick 'High Quality'. Other users can try out the others and see which one gives the best relation between quality and playability. Also the 'Video While Playing' button gives you the choice between viewing a video or a picture while you are playing the different games !

Now we are ready to go. Sit back and enjoy the nice Intro where your CyberLamborghini is flying towards the Sex Arcade planet. Once you have arrived there, the gate opens to let you enter in the fully 3D Rendered 360° Environment of this Sex Arcade palace !

In this pleasure palace you can access at any time the Set-Up Screen to change your set-up, access the on-line help to show help in your own language (with self running demo's of the different games).

Also an incredible nice feature is the 'Rescale / Redisplay' button.

With this button (represented by a Monitor) you can adapt the screen display. For example, if you make the screen display smaller it will speed up your walk-through's in the 3D Rendered 360° Environment. You can also choose to rescale the images, which means that you see the entire image in a smaller window (otherwise it cuts the edges). With this feature it makes it possible to play this game on almost any computer system, power system or not ! No bottle-necks in your graphic video adapter ...

Now let us proceed with the actual game part. Not that the walk-through's aren't nice, but I imagine you want something more ...

PRIVATE PORNTRIS has three addictive, nice-to-play Erotic games.

'Erotic PornTris' is **THE Erotic version** of the well-known game. Different blocs are falling down and you need to move, rotate and drop them to make full lines. You don't get any points, but ... you get to see the beginning of an EROTIC movie line-by-line. If you succeed to see clear the entire screen, you get to see the full digital movie.

'Erotic FaceTris' is another funny **EROTIC game**. Instead of falling blocks, you are confronted with colored falling duo-smiles (JJ). Get minimum 4 smiles of the same color together and they will disappear and you get to see the beginning of a movie line-by-line. If you make it to the end, you get to see the entire EROTIC Movie !!

'Erotic BubbleTris' is another variation. Shoot minimum 3 'Bubbles' of the same color together and they will disintegrate and show you more and more of a hot exciting movie.

There is **also more than 600 Mb of Erotic digital movie** on this CD divided in over 30 high quality HOT Private scenes. If you are just in it for the movies (which would be regrettable), just go to the CyberWomanViewer to see all EROTIC digital movies without having to play one of the games !!

This CD is available in 9 different languages : Dutch / French / German / Spanish / Portuguese / Swedish / English / Italian language support !

3. Private Prison : The ultimate Erotic Game

'**Private Prison**' is a full interactive XXX-game CD-ROM for Windows ! It is one of the first FULL EROTIC ARCADE games for Windows.

With '**Private Prison**' you will be in charge of your own private 'luxury island' prison. With your chopper you fly over the island and inspect the different girls. If you re-establish the video-link by playing an arcade part, you can see the action.

'**Private Prison**' has been designed with both the lower end CD-market (i.e. single speed CD-ROM) as the higher end market (i.e. double speed or more) in mind, as Private Prison provides through digital video for both markets. The only thing to do is to select at set-up time small video mode for single speed and normal for the others. (Now there is a renewed version on the market that has more girls, better video quality and is Windows 95 compatible).

'**Private Prison**' will provide you with hours of fun, offering you high-quality digital movies combined with exclusive full color BMP pictures. All this is packed together in a unique EROTIC ARCADE game for WINDOWS.

This CD is available in 8 different languages : Dutch / French / German / Spanish / Portuguese / Swedish / English / Italian language support !

4. PornMania Double CD-ROM

PornMania CD # 1 : DOS Based CD-ROM

Guide Dennis through the different levels trying to avoid the deadly hookers. You should try to shoot the gray ones and fuck the blond-ones. Private PornMania contains 4 different erotic play levels:

- Dennis in the City
- Dennis on Ice
- Dennis in the Jungle
- Dennis in the Factory

While playing these levels you should try to open doors. Each time a different sub-game is presented to you :

* **PornTris** : *PornTris is the adult DOS version of the popular game. You reveal a hidden erotic movie while you are controlling blocks falling down your screen. The aim of the game is to complete as many lines as possible. Each completed line will disappear and a line of the hidden movie will reveal.*

* **Memory** : *Memory is a card game where each card contains erotic pictures. You should try to find all identical ones.*

* **Solver** : *Solver is a brain-teaser. Here you have to use your logical way of thinking. Try to get to the end-point by turning doors and pushing blocks.*

* **Maze** : *Each time this game is presented to you, you get a computer generated maze. Solve it and you get to see the underlying erotic picture.*

An easy-to-use graphical menu system is build in. It lets you play all games separately, let you see all exclusive pictures and lets you see all full-screen DOS movies.

This CD is available in 8 different languages : Dutch / French / German / Spanish / Portuguese / Swedish / English / Italian language support !

PornMania CD # 2 : Windows Based CD-ROM with Movies + sound support

This second CD is a Windows based bonus MOVIE CD presented again through a nice menu system with background sound. If you have a sound card you get full sound support, if not you just see the movie. Just pick your AVI-file format movie you want to see (movies for a total of ± 72 minutes).

5. Private Collections Volume I

*Nominated for the 1996 AMEE award for Best Hardcore Picture CD
(Adult Multimedia Excellence in Entertainment - November 22, Las Vegas - USA).*
