

SYMPHONY BULLETIN BOARD BOX BY KENT SMITH

To leave this help screen and begin login, simply hit [Enter]. A list of .CCFs from the default drive will appear. Select the one you wish to access and hit [Enter] again. The CCF will be loaded and the program will halt so you can dial. Hit [Enter] when you are ready to begin. After logon transact your business. At the conclusion of the session, you have the following commands available by hitting [F7] then typing the command:

SAVE -- You will be asked for a file name, then the session dialog will be saved on disk.

CLEAR -- Clears the old dialog from the capture area.

EDIT -- Changes to DOC mode for editing, inserting page breaks, etc. Be aware of the default justification setting if there is tabular material in the session!

PRINT -- Prints the session dialog.

UPL -- Will ask for a file to be uploaded, then will transmit the file.

DNL -- Will ask for a name for the file to be downloaded, and will then receive the file and save it. Dialog for selecting the file to be downloaded must have already occurred.

PROGRAMMER'S COMMENTS

This system assumes a PC/XT with the .CCFs and worksheet on the trigger disk and all other files on C:\sycomm subdirectory. This is easily changed. The differences in how different BBs operate makes it difficult to automate to much outside of the .CCFs.
