SIGGRAPH 2001
DVD-ROM
Conference Proceedings

Welcome to the SIGGRAPH 2001 DVD-ROM Conference Proceedings. This DVD-ROM contains conference research papers and related multimedia content. All conference papers including submitted videos, supplemental images, slide presentations and URLs are accessible through the web enabled SpruceLink® DVD player provided on the DVD-ROM. No special installation is required.

Standard DVD Playback.

This DVD-ROM complies with all DVD specifications and is playable on any standard consumer DVD player. You will be able to view the submitted videos only. All additional information, including papers, supplemental materials, slide presentations and URLs will be inaccessible.

Running on Windows NT Systems.

This DVD_ROM will play on Windows NT® with any Windows compliant DVD player software. You will be able to view the submitted videos only. In order to access the additional conference materials you will need to access the DVD-ROM as one would a data disc. To access the DVD-ROM, select **My Computer** and then right click on **SIGGRAPH2001**. From the pop-up menu select **Explore**. From the file list, select **SIGGRAPH2001.pdf** to activate the Adobe Acrobat® interface if it is installed on your system. All paper content is searchable through the Adobe Acrobat Reader®.

Running on Windows 95, 98 and 2000 Systems.

The full functionality of this interactive DVD-ROM is best achieved when run on Windows 95®, Windows 98® or Windows 2000® systems. You must have a Microsoft Direct Show® compatible DVD Drive installed.

When the DVD is inserted into your system the SpruceLink Syzygy web enabled DVD player will start up automatically. You will then be able to navigate through the information using the icons listed (Figure 1). A high-level navigation map (Figure 2.) is also provided to help you access the information. When the paper, video, images, slides or web icons are selected, the appropriate applications will be started. You will need the following applications installed onto your system in order to access the supplemental material. Versions of the applications are the minimal requirements. All submitted videos are viewed using the SpruceLink DVD Player.

| **Papers** :	PDF files – Adobe Acrobat Reader 4.0
Images:	HTML – Netscape 4.5 or Microsoft Explorer 5®
Slides:	PPT – Microsoft PowerPoint 97®
Web:	URL – Netscape 4.5 or Microsoft Explorer 5

Running on MacOS Systems.

The DVD-ROM can be used on Apple's MacOS 9®, although the interface works differently. You will be able to navigate and access the video content on the DVD-ROM using Apple's DVD Player, but you will not be able to access the papers, images & slide presentations directly from the DVD stream. An additional Adobe Acrobat® interface has been developed to provide access to the papers and supplemental materials.

To view the DVD, simply start the Apple DVD Player from the Apple menu. You will be able to view all the submitted videos. If you select any of the icons that are linked to papers or supplemental materials, no action will take place. Since the Apple DVD Player is not web enabled, these buttons are not operational.

To start the Adobe Acrobat interface, double click on the **SIGGRAPH2001** DVD icon on your desktop and select the **SIGGRAPH2001.pdf**. This will launch Adobe Acrobat Reader if you have it installed. You will be able to navigate through all the papers and supplemental materials. This material mirrors the content on the SIGGRAPH 2001 Conference Proceedings CD-ROM.
