The **WinOnLine™ Review™ Shareware Edition** is published weekly except for the last week of the month by **Windows OnLine™**. It is dedicated to bringing you news and reviews on the latest files available to members of **Windows OnLine™ (BBS)** and the general community of bulletin board users. Print publications just can't match the ***immediacy*** of this electronic media. **Week after week** we bring you the ***newest shareware, freeware*** programs and ***features,*** such as:

Windows Shareware Briefs - Quick and informative reviews of the **newest entries into the shareware and freeware market**. Are they good, bad or buggy? We'll give you useful details that will tell you if it's worth your download time!

New Files - Tasty extracts from the past week of **Windows** and **OS/2** files posted at **Windows OnLine™ (BBS)**. Now you will know about that **new graphics driver**, that **freeware update**, or discovered that neat **WAV** or new **FONT** file. All without sifting through files at several other on-line services, if they even have what you're looking for! For new DOS files, call **Windows OnLine™ (BBS)** to review our huge selection.

Feature Reviews - Hear about hands-on experiences with the inner workings of the some of the **newest shareware,** with full glorious and gory details of its ups and downs. Our experienced writers bring you perspective with their frank and honest reviews.

IS IT JUST ME, OR . . .

The last couple weeks have been just ***great*** for new Windows shareware. Applications written in the latest Visual Basic, version 3.0, are starting to make their appearance. By the way, if you do not have **VBRUN300.DLL**, the latest visual basic engine, it's a **free download** from Windows OnLine, even to non-members, and ***a great excuse to call us up and check us out.*** It's VBRUN300.ZIP and in our Free Download Directory #100. Leave Wolly a message when you call 1-510-736-8343 (modem) and see the difference that quality makes while you're here. Others may advertise gigs of files (we have almost 3.4 gigs ourselves), but seven versions of the same program going back to 1990 seems a bit much to Wolly, and you spend half your life browsing through debris. Take a look at our file categories and statistics from last month to ***see how clean and what I mean!*** Be sure to check out our new Windows and OS/2 files each week. *Wolly wants **you** to call WOL!*

WHEN YOU CALL . . .

. . . be sure to **mention Wolly and the Shareware Edition.** Thousands of our readers have called Windows OnLine once they've seen all the quality files that we offer. When you call and answer the questionnaire, please mention you heard about Windows OnLine from Wolly and where you got your copy of WOLRS. It helps us to know and keeps Wolly in pizza!

SHORT RESPITE

This is the week Wolly says goodbye for his monthly visit to Betty Ford to dry out and straighten up his act. Be sure to grab the original WinOnLine Review Issue #76 (WOLRS76.ZIP) which will be released next week while Wolly's gone. Chock full of super software reviews and articles by our great staff. See you next month!

Enjoy the issue !

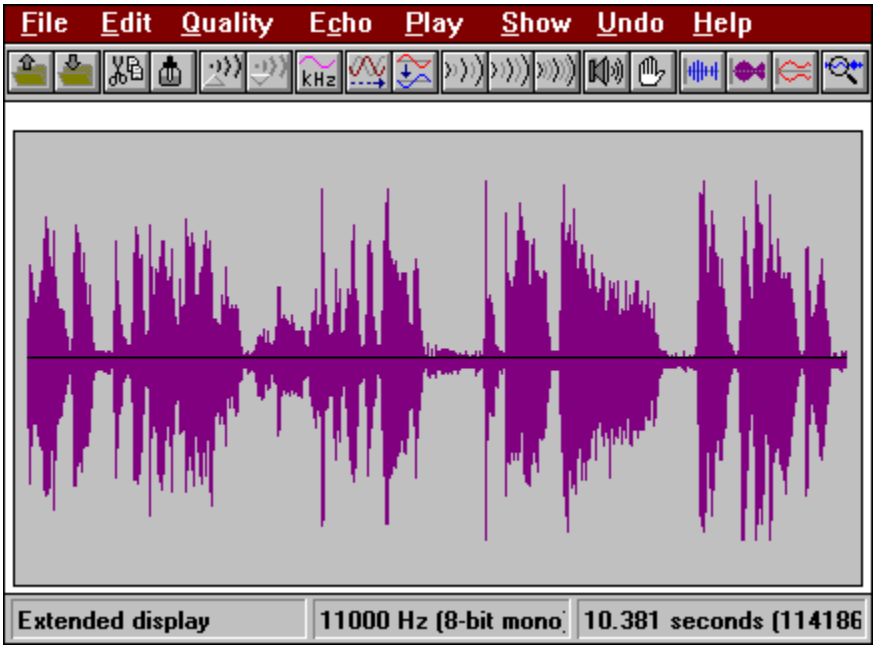
SURF WAV AUDIO TOOLBOX

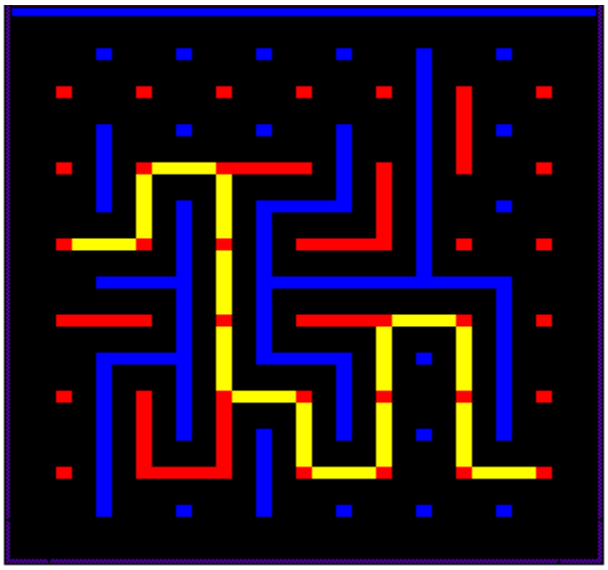
Hello Hello Hello Hello Hello Hello Hello Hello Hello



Four variations of echo is only one of the dynamite effects that Surf Wav Audio Toolbox (SWAT) brings to those who ride the WAVs. Users can select various **effects of choruses, hiss removal, volumes and sample rates**. You can even take WAVs of your favorite heavy metal groups and reverse them to search for satanic messages. A strong feature is the visuals of the waveforms and the ability to **cut and paste pieces of WAVs to edit and create new ones**. **SURF11.ZIP** (96K) provides a **handy button bar** to play with what you're playing, and can be registered for $24.99; a current copy of the program will be sent to you for **$29.99**. Hang twelve, Wolly!

SPAN IT

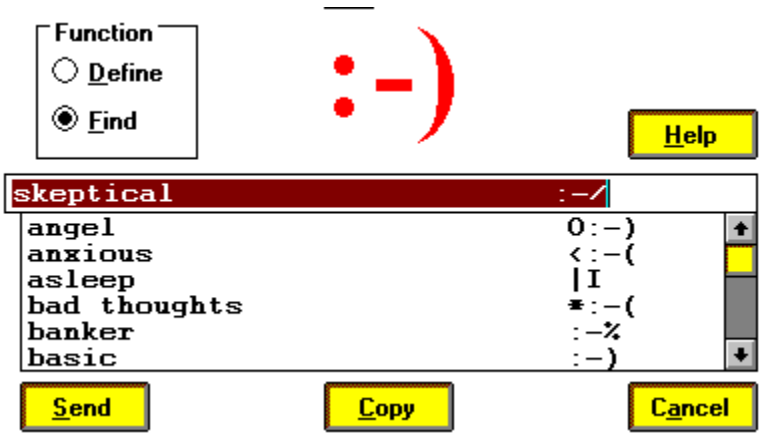
Practical artificial intelligence



Elementary, but **addictive and fun.** The objective of the game is simple. The Horizontal Player tries to connect his colored dots to make a continuous bridge from side to side, while the opposing Vertical Player attempts the same objective from top to bottom. Naturally they try and block each other. The twist to this game is the ability to **assign the computerized opponent a "personality," or strategy and abilities**, of which several are available and others can be developed. The author is experienced in artificial intelligence, and I suppose that this program is a limited venture in that direction. You can choose the size and edit the colors of the grid to make the game even more interesting. Spend hours with **SPANIT.ZIP** (196K) after you register the program for **$15.00**.

EMOTICON

Just what computing needs - - - smiley faces



E-mail has developed many of its own little quirks to cope with non-verbal communication, and "Smileys" or "Emoticons" are one of them: ;-). There's one now. To save you the trouble of remembering the hundreds of variations of these little signs, EmotIcon provides a **database** that can conveniently be accessed for both identifying these cryptic symbols or searching and insertion into whatever document you're keying. **Paste the obscure into EmotIcon while using**

the Define mode to determine the slant of the comment it accompanied. Or use the Search mode and key in an attitude or word to see if a symbol is available to further make your point. **EMOTICN.ZIP** (13K) is well programmed and I suppose useful :-/ to those into this sort of ornament. Registration is **$15.00**, but you will have to add Wolly 8) to the database yourself.

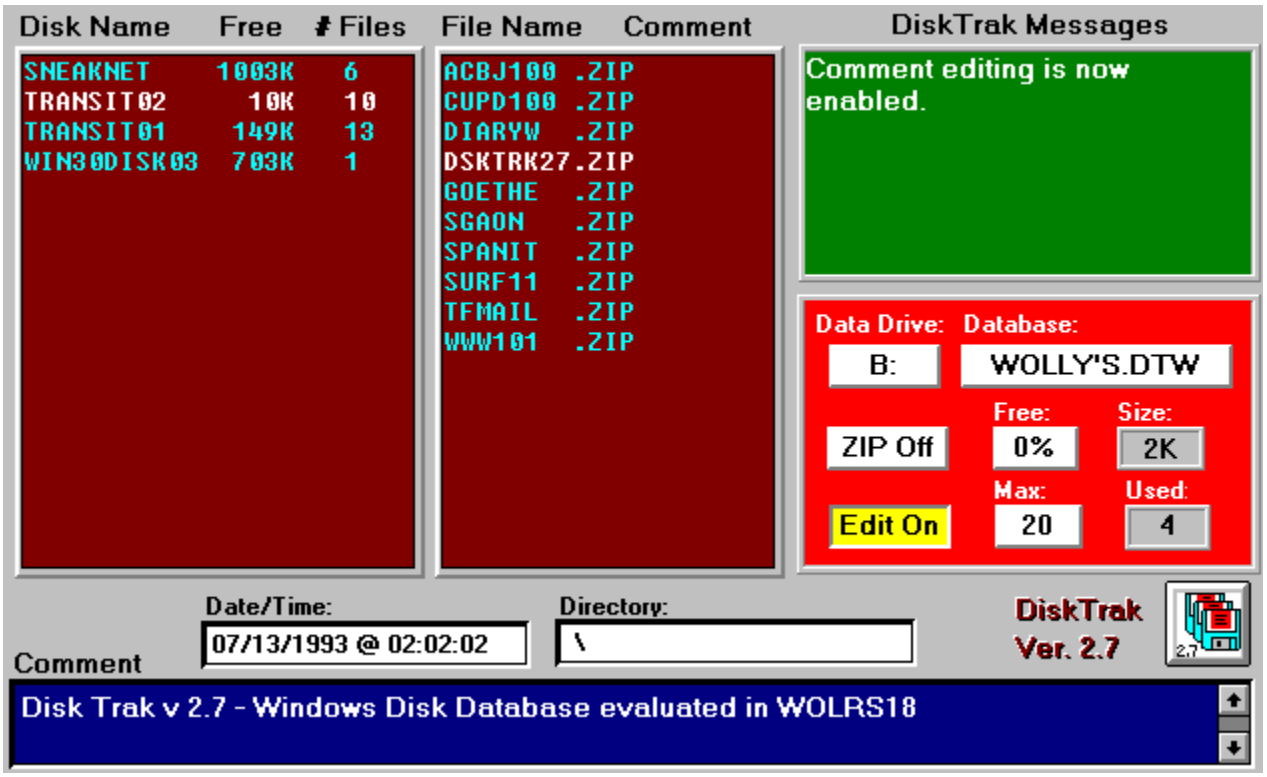
ATLANTIC CITY BLACKJACK

No gamble

Very nice! Black Jack, or 21 as it is sometimes called, is a fun and simple card game. This version from Oleg Goldfayn is **well done and easily understood,** and Wolly spent entirely too much time "checking it out" one night. The rules of the game and this computer version are **well documented** in the help file, and the **action is swift and fun**. **ACBJ100.ZIP** may be registered for **$25.00**. Wolly hopes that version 2.0 includes an option to have double Scotches brought to him at his electronic table on a regular basis. I wonder if virtual reality will be wet?

DISK TRAK

Where no disk has gone before



Floppy disks seem to breed, whether in cabinets or in precariously balanced piles on bookshelves. You absolutely know that you have that file that your friend needs, somewhere in the pile, but one which disk?!? Disk Trak is **one of the best programs Wolly has seen for automatically recording and keeping a searchable database of floppy contents.** The interface is clean, smart, and easily configurable. The r**ight mouse button will expand view windows** to triple size so more files or disk labels will be in view.

Wolly liked the ability to **add a comment to the disk files** so you are not limited to your recall of the meaning of eight character DOS cryptograms. Disk Trak brings a **strong search mechanism** to the table that can seek out that missing file with relative ease, and includes the comment file. The key to the system is the disk's volume label, and Disk Trak will prompt you to add one if it is necessary. **DSKTRK21.ZIP** (186K) has **many other features to ease your disk management headaches**, and even provides for color adjustments to your preference. This is a heavy duty program that deserves your evaluation if you suffer from diskette glut, and deserves your registration at **$37.50** if you find it as useful as Wolly did.

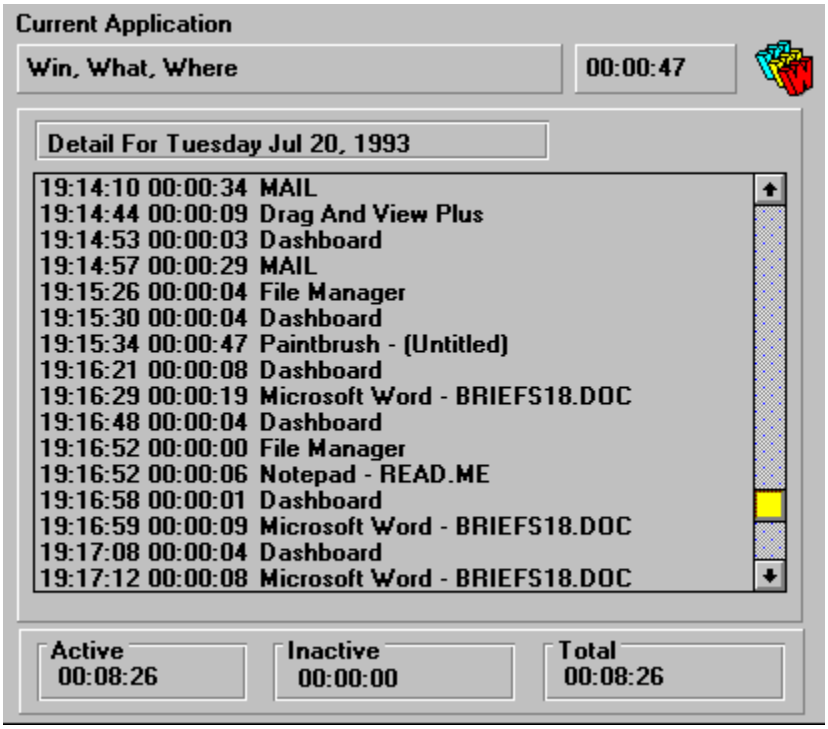
RIPSPACE

Disk hog router-outer

The Windows operating system has the reputation of being a disk hog, and rightly so. Many newer programs can easily occupy between ten and fifteen megabytes of that valuable electronic real estate, and soon we are painted into a corner. RipSPACE **provides a literal look at the content of each of your drives** so you can identify the culprits, and **is equipped with some special filters** to further refine your search. Sort the findings alphabetically, by size or not at all. A button bar conveniently accesses the options available from **RPSPC20.ZIP** (91K), which can be registered for **$10.00**.

WIN, WHAT, WHERE

I caught you. Too much Solitaire and not enough work, Wolly.

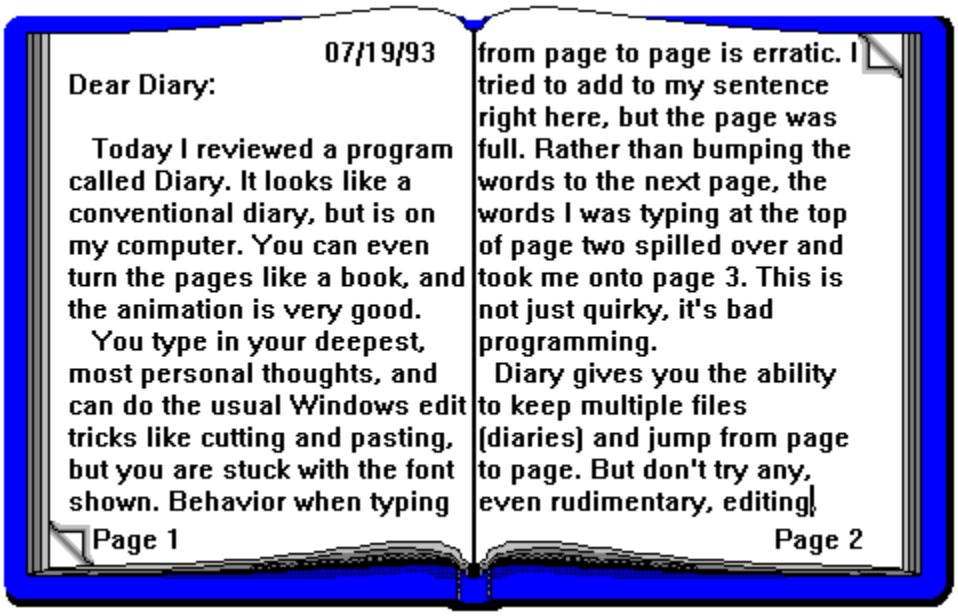


Observe the frenetic pace at which Wolly works! At last, I can document my quick keystrokes and Herculean effort to Bob, that slave driver editor, with Win, What, Where. It **quietly monitors all your Windows activities and reports them when you want** in detail (the detail report is shown in the illustration -- more impressive, eh?) or summary. Captions can

accompany the time spent, or the program name with or without the path. Records can be automatically deleted if you wish at an interval you choose. **Data can be selected and exported in common file types**. Register **WWW101.ZIP** (195K) for **$37.00** and another program named *What Happened?* is included. While unreviewed, it claims to make a snapshot of your system conditions at intervals you select in order to help diagnose problems.

DIARY

Read the book. It tells the story:



continued from the book graphic . . . There is no search or any other fancy stuff yet (scheduled for the next release, but then that's the way book diaries are also, though they seem visually bigger than this in real life. Wolly concludes that this **Diary should not have been made public.** **DIARYW.ZIP** (69K) can be registered for **$5.00** that includes use of the next version, which we hope is better.

TRUE TYPE FONTS

Goethe right here to get thy latest fonts

Goethe **GOETHE.ZIP (25K)**

OXNARD **OXNRD.ZIP (35K)**

Vassallo **VASSALLO.ZIP (41K)**

GRAY TREE FROG ADDRESS LIST

Address and phone simplicity

The program prides itself on its **simplicity**. Name and address information, comments, business information, phone numbers and a dialer. Nothing more, but nothing less. Actually, something less of what Wolly expected. The Gray Frog jumped to unexpected places and the documentation, and the program, are thin. **TFMAIL.ZIP** (158K) can be registered for **$10.00** if it meets your needs and expectations.

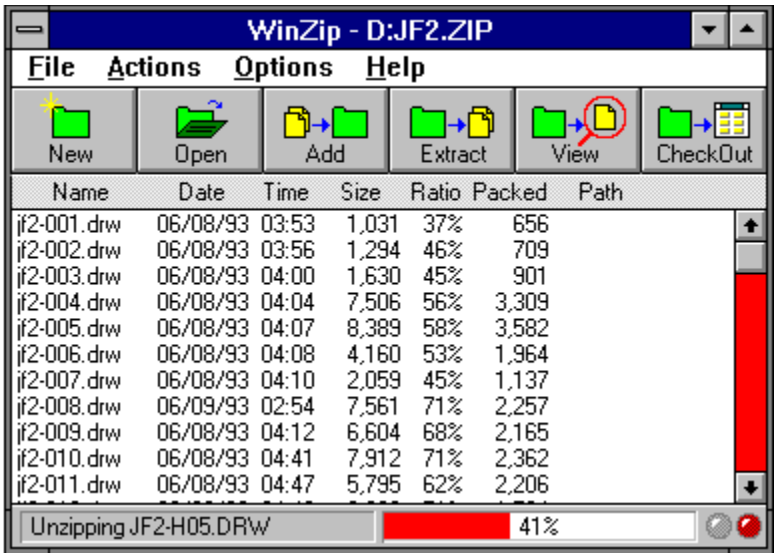
WOLLY'S TEST SYSTEM

WinZip 4.1

WinZip 4.1 is the latest version of one of the better, if not the best, file compression shells available for Windows. A few months ago we looked at an earlier version of this program, version 4.0. Since then, the author, Nico Mak, has made several improvements and refinements to the basic program. So, to keep everyone abreast of what's new in file compression I thought we'd discuss the new ***WinZip 4.1*** program.

No matter how or why you use compression programs, the ***WinZip 4.1***, program will definitely make your life a bit easier. Anyone who uses a computer has, at one time or another, had occasion to work with compressed files. Whether it's simply uncompressing the files you download from a bulletin board or reclaiming hard disk space by compressing files, sooner or later you'll need to work with a file compression program. The more common types, or variations, of file compression are identified with the extensions: ZIP, ARJ, LZH, and ARC.

Each of these compression formats is furnished with individual programs to both compress and uncompress files. So, you do not necessarily need to use a shell program for any of these compression utilities. However, a shell program such as ***WinZip***, does make working with these compression utilities a bit easier. All you need to do is tell the ***WinZip*** program where you keep the various compression utilities when you install and setup the program. The program then knows where to look when it encounters files with any of the listed compression formats. This makes life a bit easier for me, since I can seldom remember the complete path of any of these programs on my system.



The latest version of the ***WinZip*** program adds to the considerable capabilities of its predecessor. So, in addition to the drag and drop interface of the previous version, this update includes improved Add, View, and CheckOut dialogs, passwords, and PKZIP 2.0 disk spanning support. Another useful addition to the program is the status bar at the bottom of the window. This bar now shows the status of the work. The information to the left shows the name of the file within the compressed file that is being unzipped. To the right a bar type gage shows the progress of the complete unzipping operation. There are also two small lights at the right end of the status bar. A green light illuminates when the program is ready and a red light is lit when the program is busy unzipping files.

WinZip 4.1 now offers a variety of viewing options for compressed files. When a file is selected and the **View** option is clicked, a dialog box appears to allow you to select the program to run. So, you have the choice of running the specific program associated with the selected file, running the internal viewer, or any other external viewer.

The program is still quite easy to use and very intuitive. ***WinZip 4.1*** can be used to extract files from an archive, add files to an existing archive, or create a completely new archive. By simply setting the associations for your ZIP, ARJ, LZH, and ARC files set to the ***WinZip*** program, opening an archive is as simple as double clicking on the archive file name. These files may also be opened from File Manager by dragging and dropping the archive file onto the ***WinZip*** icon. Or if you are in the ***WinZip*** program,, the **Open** button may also be used. The main program window shows a listing of the file names, sizes, and date/time stamps for all files in the opened archive. The list can be scrolled and sorted on any field.

Other new features in ***WinZip 4.1*** include:

- An all-new and easier-to-use Add Dialog Box.
- The CheckOut Dialog Box now lets you create permanent Groups.
- Password support.
- Support for creation of ZIPs that span multiple floppies.
- Support for all PKZIP 2.0 compression methods.
- More sort fields (you can click on titles in the header to sort).

- The compressed file size and compression ratio are optionally displayed.
- Optional always on top feature.
- Multiple WinZip windows no longer overlay each other.

So, if you use compressed, or archived files, the ***WinZip 4.1*** program is definitely something you should consider adding to your system. The program requires Windows 3.0 or 3.1 in Enhanced or Standard mode. Members of Windows OnLine can find ***WinZip 4.1*** as WINZIP41.ZIP in Directory #38 - (Windows-Accessories T-Z). The following archiving shareware programs are also available: PKZ204G.ZIP- (Directory #100 - FREE DOWNLOADS); LHA213.EXE - (Directory 127 - DOS -Archivers Utils A-L); ARJ241.ZIP - (Directory 127 - DOS -Archivers Utils A-L); ARC-E.ZIP - (Directory 127 - DOS -Archivers Utils A-L).

Notice:

Windows OnLine (BBS) makes every effort to identify and to post only shareware, freeware, demos, working models and drivers (software files and programs) for it's membership which are intended for free public distribution. Due to the lack of documentation and other descriptive files contained within certain archives, it can be quite difficult to identify and remove improper and otherwise copyrighted files and programs from our file listings.

It is the policy of Windows OnLine (BBS) not to allow such improper and illegal files and programs on the BBS, at any time. Our Readers and Members are asked to cooperate with us in our efforts to identify such improper files and to assist WOL in its efforts to remove ANY inadvertent inappropriate file postings.

Thank You.

The following file listings became available on Windows OnLine two weeks prior to the issue date, and may not yet be available on some bulletin board systems. Many more files were added to our library during that time, but only files of recent date are listed here. Members of Windows OnLine can download WOLRECNT.ZIP or use our mail door to obtain a complete listing.

This listing is as of June 1993 and is presented as an example of the tremendous number of WOL directories and files available to members. Remember, these are clean file listings, purged of useless duplicates or obsolete files. Windows OnLine™ works hard to gather the best and latest for its members!

Windows OnLine™ brings
THE BEST AND LATEST FILES

NO JUNK - we obtain the files ourselves, screen them thoroughly and edit their descriptions

THE LATEST FILES and **MORE FILES** - we get them EVERY DAY!

MINIMAL DUPES - we clear off the old when we bring on the new

EVIDENCE: Scan the **NEW FILES LISTINGS** in this issue. This is just our Windows and OS/2 files. Twice as many DOS files come in each week in addition to the quality and quantity you see here.

NOW, LOOK AT THE SIZE AND NUMBERS OF FILES in our listings:
