About Windows OnLine™, (the BBS)

About the Shareware Edition

The **WinOnLine™ Review™ Shareware Edition** is published weekly by **Windows OnLine™**. It is dedicated to bringing you news and reviews on the latest files available to members of **Windows OnLine™ (BBS)** and the general community of bulletin board users. Print publications just can't match the *immediacy* of this electronic media. **Each and every week** we bring you the *newest shareware, freeware* programs and *features*, such as:

Windows Shareware Briefs - Quick and informative reviews of the **newest entries into the shareware and freeware market**. Are they good, bad or buggy? We'll give you useful details that will tell you if it's worth your download time!

New Files - Tasty extracts from the past week of **Windows** and **OS/2** files posted at **Windows OnLine™ (BBS)**. Now you will know about that **new graphics driver**, that **freeware update**, or discovered that neat **WAV** or new **FONT** file. All without sifting through files at several other on-line services, if they even have what you're looking for! For new DOS files, call **Windows OnLine™ (BBS)** to review our huge selection.

Feature Reviews - Hear about hands-on experiences with the inner workings of the some of the **newest shareware**, with full glorious and gory details of its ups and downs. Our experienced writers bring you perspective with their frank and honest reviews.

The WinOnLine™ Review™ Shareware Edition *is published weekly courtesy of the* **Windows OnLine™**

We hope you find this weekly publication of great value and interest and become a regular reader. We'd appreciate your comments and suggestions. Leave a comment (C) on **Windows OnLine™ (BBS)** at **1-510-736-8343** or write to,

Sound Reasoning???

YO! What is it with all these sound files!? Do you *really* have 800K to store the theme to "Leave It To Beaver"? And why? What for? Wolly *does like* nostalgia, as long it's not about old stuff. But this I can't figure!?!

Okay, Wolly admits to having Captain Picard say "*Welcome to the 24th Century*" when he boots *his* machine (hey, it is a 486!). Beyond that and C3PO pleading "*Please don't deactivate me!*" when I exit, who needs all this stuff?

Week after week I see uploads of **monster WAV files** of long-dead TV program themes and the like. I can't figure it. I've noticed that the occasional rap excerpt gets through to the board sometimes, too, despite my explicit instructions to the WOL censor. (rap --- music for the melodically challenged).

All I really want to know is --- who is it out there that keeps creating these huge files, and who is it out there that downloads them -- and why? Wolly really wants to know, for his doctoral thesis. Leave me a message, informative, humorous, hostile or otherwise, on Windows OnLine (BBS) or c/o WOL, Box 1614, Danville, CA 94526-6614.

Thanks!

Wolly wants to thank those **Windows OnLine™ (BBS)** members, new and old, who have taken the time to say some nice things about the new **WinOnLine™ Review™ Shareware Edition** and the original Review. Your Sysop and Publisher Frank Mahaney and all the folks here at **Windows OnLine™** work hard (even Wolly does) to bring you these electronic publications.

Our efforts got a mention in the May 1993 issue of *Windows User Magazine*. Writer Steven Bobker spoke about help files in his regular Insight column, and showed real insight when he wrote, "*. . . an excellent bimonthly newsletter called Windows On-Line (WOL) is distributed as a huge Help file . . .*"

We're glad that so many readers enjoy our publications and really enjoy hearing from you, because it helps to keep us going. Keep those electronic and paper cards and letters coming in.

This Week in WOLRS

There were far too many files for Wolly to get to this week (see the new files listing), but there's over a dozen new shareware program mini-reviews and true type font images for your information and BBSing pleasure. Hope you enjoy them and Ed Hoffman's wonderful review. Wolly also asks that you pay special attention to his thoughts at the end of the Shareware Briefs column this week for an idea worth considering.

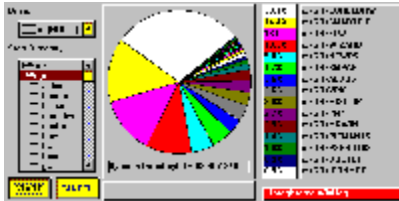

Thanks & Enjoy,

WIN HOG

This is no pig

When disk space becomes short, it's time to determine **what's fat and can go** (no ex-wife jokes, now). Win Hog may not sniff out truffles, but it will sniff out the fat stuff on your drive. A *very useful difference* that Win Hog brings to the genre is the ability to look at your entire drive, like most, or **drop down to any level of subdirectories to visualize the content**. The left window presents a pie chart with the right window displaying the color coded percentages and directory or file names. Wolly found that 34% of his C drive was taken up by the Graphics subdirectory, and 36% of that subdirectory was hogged by Corel Draw. Pretty amazing, since Wolly can't draw.

WINHOG20.ZIP (18K) was a bit slow on the uptake, spending nearly a minute analyzing and displaying the content of my 240meg 15ms drive, but the wait was well worth it. Send author Michael Price the low-low price of **\$5.00** for registration including a personalized version of Win Hog on a return disk, or for \$15.00 he'll include the source as well.

DISCARD

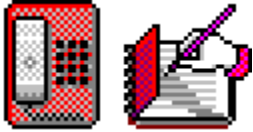

"Solitairery" Game

Discard admits to being similar to Icicle, another **Solitaire type card game**. In this case, you are dealt four cards and are allowed to discard only those which are in the same suit and lower in rank than another card which appears. Click the pile when the possibilities are exhausted and another four cards are played. You've won the game when only the four Kings are showing. **DISCARD.ZIP** (99K) is another shareware game from tagliaferri software. Matt says in his README.TXT, *"If you find this game half as addictive as my girlfriend, please send \$5.00 (cheap!) to: Matt Tagliaferri Software."* Well, Matt, I don't know how addictive your girlfriend is, but the game was fun <g>.

DIALOG

Dialer & more

DiaLog is **sort of a dialer**, also a somewhat **limited contact manager**, and yet also **logs calls**. It's kind of a jack-of-all-trades which might fit some of your needs, albeit on a limited basis. It's interface is quite direct and to the point, and if only used as a dual phone directory and dialer, I guess it's worthwhile, if that is all you need for your personal or professional purposes.

Two directories are provided, and it will address your modem on Com 1 through 4 with either pulse or tone dialing. A clock is in your face, and calls or anything can be timed with the stopwatch feature. Click into a note area, review your call log, do just about anything except export or excerpt your records. If this review seemed a bit confused, perhaps it's just because DiaLog is kind of a lot of different things, but Wolly's not sure if any of them are quite enough.

FONEW20.ZIP (92K) is **\$18.00**

TRUE TYPE FONTS

Three fonts for the Trekkies!

TERMINATOR TWO [TERM2-TT.ZIP \(13K\)](#)
PORTER LIL' KAPS [AGPO-T.ZIP \(50K\)](#)
Crillee [TRK FONTS.ZIP \(72K\)*](#)
 (Klinzhai) [TRK FONTS.ZIP \(72K\)*](#)
TNG MONITORS PLAIN [TRK FONTS.ZIP \(72K\)*](#)

*includes all three, Crillee, Klinzhai, and TNG Monitor, described as Star Trek fonts.

Wolly is still confused about The Terminator. Wasn't he the guy who wanted to be the dead composer? I distinctly remember him saying, "I'll be Bach!".

SOLIGAG

Another trick for the unwary co-worker

When we left our hero last week, he was goofing on the dirge in the next cube by planting a phony Tetris program to throw off his rhythm. Not a moment too soon comes SoliGag, another **freeware** (nastyware) program from author Geoffrey Bard. This time the normal-looking

Windows Solitaire icon triggers a dialog box that tells our villain "I'm busy now, try again in about 10 minutes". Try again, and the response is repeated, though the time has changed by the interval between tries. At the end of the ten minutes the cycle begins again.

If this situation wasn't so prevalent, it would be much funnier. Wolly has a consultant friend who frequents a local county installation on a regular basis and finds a lady who is still playing Solitaire every time he visits. Perhaps Larry should download [SOLIGAG.ZIP](#) (4K) as his own personal crusade to increase the county's productivity. For some odd reason, Wolly's 386 computer gagged on this program, while it ran perfectly well on his 486. Perhaps the 386 has no sense of humor.

ACCENT

Acute, Grave, Circumflex, Umlaut, Tilde, A ring, & Cedilla

Raise your hand if you have a handy chart of the Windows extended ANSI characters within reach. Thought so. Who can remember the ALT + ##### assignments, especially when you get into the more obscure ones? If you find yourself using **diacritics, those little accent marks**, often in your writing, Accent may be for you.

The program allows the use of a hot key combination to **toggle to** Accent and an entire **new keyboard definition** table, or for individual diacritic or other character substitutions, to use it to access special characters like ™, © or £. Multiple configurations are available, and custom setups (lower case "c" to represent "©" when using a hot key combination) for your own particular needs could be very helpful. [ACCENT21.ZIP](#) (79K) is from Pro+++ Software of Canada, which offers convenient alternative arrangements to collect your **\$25.00** registration fee. Did you know all these? Wolly didn't. NOW, pronounce them.

ACCENT:	Acute:	á é í ó ú ý Á É Í Ó Ú Ý
	Grave:	à è ì ò ù À È Ì Ò Ù
	Circumflex:	â ê î ô û Â Ê Î Ô Û
	Umlaut:	ä ë ï ö ü ÿ Ä Ë Ì Ö Û
	Tilde:	ã õ Ã Õ ñ Ñ
	A ring:	å Å
	Cedilla:	ç Ç

DATE NAG

Yeah, I think I went out with her once

Are you in constant trouble over missing birthdays and anniversaries of obscure relatives . . . like your spouse? Those of us who are date-disadvantaged could benefit greatly from Date Nag. But this program is **much more than a simple reminder**. It will also log computer work time for your records.

Place Date Nag in your Startup group and it will remind you of the day's events that you have scheduled. Events are not simply dates, but descriptions, categorized and prioritized. In the case of events which require preparation (like getting that gift *before* the anniversary), set a specific number of days before the event when you'd like to be notified. Ticklers, which cannot be preceded by a notice period, are structured to remind you on a given day of the week to back up your drive, for example. Print facilities are also offered for your convenience. **NAG7.ZIP** (88K) is an intelligently written piece of shareware from Denam Systems, registration is **\$20.00**. Take a look and see if it meets your needs.

PHONE-BOOK

Put it on disk and see if you can rip it in half

Modest Sameer Gohil offers Phone Book as **freeware** for your use. The program is very simple, **perhaps too simple**. Names and numbers only can be entered, then saved and individual records printed. The search function only works if you type in the name exactly as it appears in your database, partial entries need not apply. You cannot browse your database, either, if you can't find your party. Thanks, Sameer, for **PHNBOOK.ZIP** (22K), but a bit more functionality would make it a lot more usable.

SUDS W

Home Beer Brewers of the world unite . . .

... *you have nothing to lose but your sobriety!* Home beer brewing is quite a hobby for many people. There's magazines devoted to the hobby to out-Bud Bud, and now a computer program dedicated to the Sudsers. If SudsW is any indication, they're a serious bunch. Author Michael Taylor (no relation to the wine folks???) says that tracking his various recipes and batches was the inspiration for SUDSW - the **brewers cookbook and log program**. He says, "From a simple attempt to coordinate some recipe and log notes, SudsW turned into a year-long project and has resulted in an extremely comprehensive brewer's program."

SudsW records are said to be **dBase III compatible** and can be browsed using a utility capable of reading that format. I must admit I never got the program to work the way I expected it to. Recipe and template boxes came up empty no matter what file I tried to load. If you're a beer brewer, or wish to be, disregard my incompetence and download **SUDW11.ZIP** (223K) and check it out. Registration is a mere **\$15**, \$10 if you provide a recipe to be included in future releases. Personally, I'm waiting for a home Scotch program.

WIZ FORMAT

Wisely, Wolly avoided an obvious comment

Wiz Format goes **beyond** making **background formatting** exercises less of a burden. It also offers disk copy facilities, evacuating those files directly to another disk or via memory. The interface is quite attractive and direct, with obvious purpose and a constant readout of your format progress.

WIZFMT30.ZIP (390K!!!) is a **heavyweight when it comes to a download**, with it's pretty setup system and collection of compressed VBX files. In actuality, its installed subdirectory contained only a **69K executable and 15K help file**, though accompanied by three WRI files including the 316K manual. Register Wiz Format for **\$15.95** for the 5.25" disk size.

ZIPPITY-DO-DA

Zippity Yay!

Well, Jiminy Cricket, this little **zip shell** is alright! Very simple to use to unzip or zip up files. Choose targets and destinations from the directory listings right and left, trigger the extra compression or volume label features in the latest PKZip release, and away we go! RLT Software says, "This software is released as **Helpware**. If it helps you, use it! No fee will be charged." Thanks, Rick Todd, for **ZDODA103.ZIP** (10K).

TAKE HOME

With all due respect, this should be called "Leave There"

One of the WinOnLine™ Review™ staff was recently whining about how much he had to **pay Uncle Sam** this week. Maybe if he was smart enough to fill out a W-4 properly last year he wouldn't have these problems. Maybe he should use *Take With --- The Net Pay Calculator*, which is designed to tell you just **how much you will net from your pay** when you make those fateful selections.

You can choose from Married or Single, and then the number of dependent monsters inhabiting your home, whereupon Take Home will give you the bad news. This is quite an involved program, **allowing for additional deductions and 401K adjustments** as well as differing pay periods. **TAKE-W.ZIP** (54K) may not save you from the tax man, but it will help you model differences between scenerios and "what ifs" to determine what changes are necessary to save your butt next year, Bob. Take Home is a program aimed more at personnel (excuse me, *Human Resources*) departments and is registered at varying prices from **\$55.00** on up, depending upon the state configurations you need.

Wolly's Shareware Smiles

Wolly can't help but smile at the many authors who present **Freeware** to us through the goodness of their hearts. Their generosity is appreciated, and we should make it a point to let them know.

Drop a card to the author, or a message on the on-line service where they hang out, and let them know of your feelings. You may want to put a \$5 bill in that card, or, parallel a request of some programs I've seen around. **Make a donation to a good cause: the American Cancer Society**, Greenpeace, your local United Way, to Public Radio, or some deserving cause, and

make it in that author's name. Then, let them know of your action.

Match *their* spirit of giving in the most wonderful way possible. Make a donation to a worthy charity!

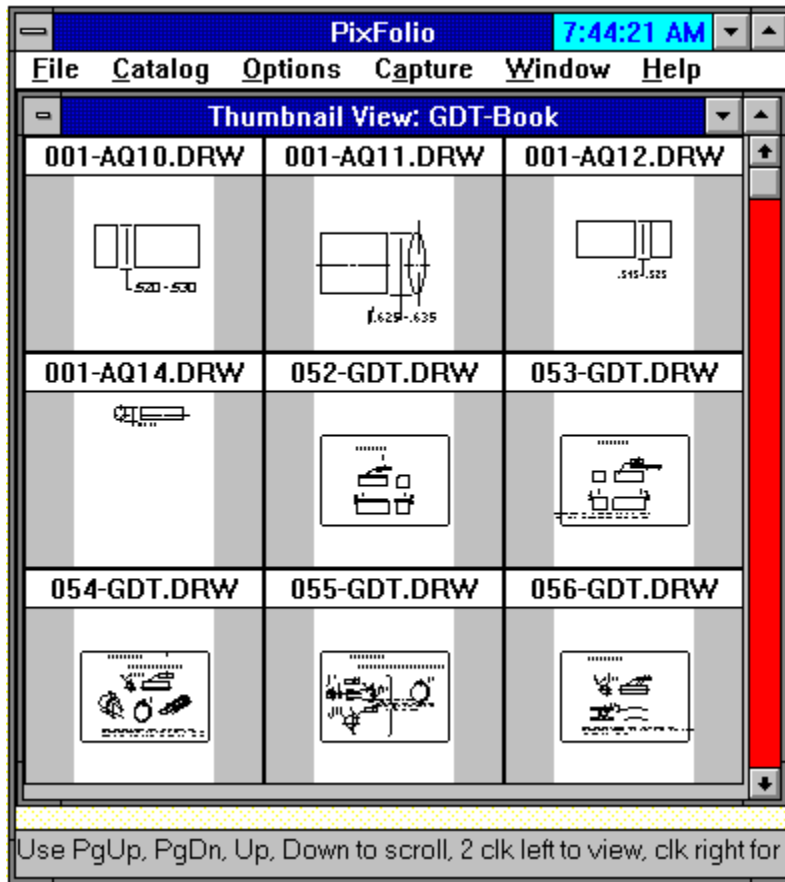

Shareware Review

PixFolio 2.0

I'm not sure if Murphy has any laws for computers, but if not, here's one he should definitely add to his list. ***The ability to lose a file is directly proportional to its importance to a project and the size of your hard drive.*** By way of an example, I offer the following. As I recently put the final touches on the text for a handout for one of my seminars, I needed only to add one graphic to complete the project. So, I went to the sub-directory where I had placed all the graphics for this project, and as you might expect it wasn't there. Even though I am the only person who uses the computer, and because I could never lose something as important as that graphic, I knew the computer gods had to have stolen it. So, I set off to find where they had hidden the file. After an hour, or so, of hunting, I found it right where I had left it. I then retrieved the file and finished my project. But this adventure did have a bright spot. Through this exercise in frantically searching my hard drive, I decided to find a program that would take care of my graphics, even when I didn't. The program I found for this is ***PixFolio 2.0***.

PixFolio is a shareware program that allows you to group your graphics into a series of individual catalogs. But rather than simply listing your images, the ***PixFolio*** program allows you to set up your catalog in whatever way you desire. You can use the program to set up a catalog based on the application of the graphics, or based on a project, or even the graphics format, color resolution, or size. The arrangement and content of each catalog is left to you to decide. The one feature of ***PixFolio*** that I find especially useful is that the graphic files I catalog do not need to be in the same place. Therefore, I can keep the individual files where I originally put them and once I have them cataloged, this program will find the graphic for me.

When I need a graphic for a project I simply call up the program and open the catalog. You have the option of looking at each graphic as full size, or as I often do, as a thumbnail view where each graphic in the catalog is shown. Though viewing each graphic in a catalog works well for small groups of graphic files, if you have a catalog with many graphics you may also search for a graphic with a keyword. The keyword for each graphic may be assigned when the catalog is built and can save you a bunch of time looking for a single graphic. The program also allows you to attach your own notes, or comments, to each graphic.

Another nice feature of the program is multiple catalog listings. The specific content of any particular catalog does not necessarily need to be exclusive. Graphics may be listed in more than one catalog. *PixFolio* can also read a variety of different graphic formats. And the program can also convert graphics between formats rather easily.

The graphics formats supported by *PixFolio* are:

- BMP/DIB-Windows Bitmap
- CLP - Windows clipboard file
- DRW/GRF - Micrografx draw and graph files
- EPS - Encapsulated Postscript with imbedded TIFF preview images
- FLI/FLC - Autodesk Animator and Animator Pro (tm) files
- GIF - CompuServe Graphics Interchange Format

ICO - Windows Icon
IFF - IFF/LBM (Amiga) used by Computer Eyes frame grabber
IMG - GEM/IMG (Digital Research)
JPG - JPEG
MAC - Macintosh MacPaint files
PCX - Microsoft Paint & PC Paintbrush
RLE - CompuServe Run Length Encoded
TGA - Targa
TIFF- Tag Image Format. Most formats including 24 bit color are supported
WMF - Windows Metafile
WPG - WordPerfect Graphics

Although most graphics I use are on my hard drive, there are times where I store some graphics on floppies to save space. This program can even keep track of these floppies. When I need a particular graphic the program even helps me find it. *PixFolio* also offers a variety of supplemental features these include a variety of screen capture options and a selection of graphic tools to manipulate your graphics. Though not as sophisticated as other special purpose programs, the tools included with this program will allow you to rotate, re-size, flip about an axis, crop and expand your images. *PixFolio* can also perform dithering.

So, if you use graphics and sometimes lose track of where you put them, the *PixFolio* program can make your life a bit easier. Members of Windows OnLine can find *PixFolio* as PIXFOL2B.ZIP in Directory #21 - (WINDOWS-Graphic/Paint/Design/CAD).

About Memberships

Windows OnLine™ Interactive Database Services

What does Windows OnLine™ offer it's membership?

1. FILES!

We have been told that we have one of the most extensive Windows file databases anywhere in the world. Because we are so discriminating, we supply you with some of the best and latest DOS, OS/2 files!

You won't find a lot of "junk" files on WOL. As our regular members know, we pride ourselves on having better file descriptions and, once our files are out of the recent uploads directory, unlike other bbs's, all of OUR file dates are CORRECT!

We have many features at WOL to make your Windows, DOS, OS/2 and other file collecting both fast and easy. We remove dupes and older files as fast as we can find them.

WE supply almost all files you see here. Therefore, you can be sure that you will see many new files every day, that is our pledge to our membership.

Is there more? ... you bet! But, We'll let you discover some of our innovations for yourself.

2. Network (Message) System

Receive support from within our own local message conferences, or access the world! Windows OnLine is your doorway to four international mail networks:

ILINK - RIME - SMARTNET - INTELEC

Explore over 650 separate Conferences that contain over 200,000 current messages on topics you're interested in .We have Windows Local, Windows Tips, and hundreds of internationally echoed conferences like Windows, Multitasking, DOS Tips, Languages, Tech Support, Microsoft Support and much more.

3. Doors

These external programs allow you to save your extra time for your next visit. Mail doors help manage your off-line mail and capture the our New Files listings, all automatically. We even have a Voting Door so you can express your views on the burning issues of the day, for fun and information.

4. **WinOnLine™ REVIEW™ Magazines:**

Read our NEW WinOnLine™ Review™ Shareware Edition

We offer TWO Windows Magazines. Past issues of the WOL NEWS, WOL *Weekly* and the WinOnLine™ REVIEW™ and NOW the Weekly Shareware Edition. All issues are downloadable from directory #100, and are FREE to Members.

5. **Bulletins**

We use bulletins to keep you informed of important information and discuss subjects that you want to know more about. They are posted as a valuable reference.

Details

All memberships with file privileges have their time given in eight hour blocks. That is, with each call you will start with 480 minutes. Time is given this way until you run out of minutes. Your account is only charged with the time you use. We feel that this will be a great benefit to all callers who wish to call WOL once in awhile and download like crazy, such as on weekends. This eliminates any real need for saving your excess time.

Membership fees are non-refundable - memberships can not be upgraded or downgraded. You may purchase and use more than one membership at a time. Your membership expires when any one of your limits are reached. You can renew your membership at any time and your new membership will automatically start when your old membership expires.

Windows OnLine™ reserves the right to deny membership or give a prorated refund to any existing member, at its option, for any reason.

PURCHASE YOUR MEMBERSHIP NOW!
