Voucher Checks

Choose this check if you want lots of room to detail expenses. For example, when you are paying multiple invoices with one check, list all the invoice numbers in this large voucher area. Or when making a partial payment on a large invoice, such as a home remodeling job, the voucher area allows you ample space to list exactly what the check covers. Some small businesses use this format as a payroll check.

Choose this check if you prefer a larger, business-size format. There is ample room in the "memo" line at the bottom of the check to list tax deductible expenses, or you may use this area to list the invoice number(s) of the bill you are paying. This is a very professional looking check, also popular with small business owners.
