=====-----**PURPOSES**-----=====

This template was designed using Flash Technology. Flash has the capability to generate text content from text files. It is a great tool to develop a site that needs **frequent changes** to the text contents.

One of my design aims is **speed**. I design Flash sites that **load fast**.

I believe I am offering you a great looking site without spending a lot of money to build an informational site about you and/or your business.

This template is to give you the **general look** and **feel** for a site.

If you want to **customize**, I can **individualize** the site to fit your needs for a fee.

Since I already have the **prototype**, it is **much easier** and **less time** for me to **modify** the design for your specific needs.

You will **pay less** for **quality work** if you decide to work with me on customizing the site.

For any customizing such as logo design/placement, graphics work, navigation links.

Please contact webmaster@5sec.com

=====-----**TERMS OF USE**-----=====

By downloading our FREE flash templates, you agree to the following:

- 1) These templates are supplied for FREE. And may be used for both personal as well as commercial sites.
- 2) Please keep in mind that the FREE templates feature a credit line at the bottom of each page. Should you wish to have this credit line removed. Please email me and we will discuss it.
- 3) You may not sell or re-sell our FREE templates without a Written Agreement with 5secINTERACTIVE.
- 4) Under no circumstances do we provide the Flash code for these FREE templates.
- 5) We do not provide technical support so please don't ask for any.
- 6) You may edit the text source files. But do please give credit for the design and creation to 5Sec INTERACTIVE.
- 7) By using this template you agree to indemnify Karna Saleh or 5Sec INTERACTIVE from any liability that might arise from its use.

=====-----REQUIREMENTS-----=====

- 1) You must have flash 5.0 plug-in installed in your computer to be able to preview this template. If you don't see the animation that means you don't have flash. Go to http://www.macromedia.com/shockwave/download/index.cgi?P1_Prod_Version=ShockwaveFlash. The installation should take a minute or two on a 56K modem.
- 2) Basic HTML knowledge will help you to be able to edit and make changes to the content.
- 3) Even if you don't have knowledge of basic HTML, you should be able to edit and make changes to the template by carefully following the below " **INSTRUCTIONS**".

=====-----INSTRUCTIONS-----=====

•• **PREVIEWING**

Double click - "index.html".

Browse from one directory to another. Each directory has a different content.

Each design has and will have a different number of directories.

•• **WHAT CHANGES CAN YOU MAKE TO YOUR CONTENT?** You can:

Change the attributes of the text and the paragraphing.

Change Font face, Font size, Font color, Bold, Underline, Italic and Paragraph alignments

Create external links or forwarding email.

•• **SOFTWARE TO EDIT THE TEXT FILES**

Use any editing programs (a text editor) such as Note Pad or Word.

=====-----BASIC EDITING-----=====

I have created this step by step tutorial for a beginner.

If you are more advanced you may skip it.

IT IS IMPORTANT THAT YOU PRINT THIS README FILE FOR REFERENCE TO HELP YOU EDIT THE TEMPLATE.

PLEASE REMEMBER DON'T RENAME OR MOVE THE FILES, KEEP THE SAME DIRECTORY STRUCTURE AS IS.

Each file has to be where I intended it to be when I designed the template.

You may rename the index.html.

NOTE: Before you start editing.

Please make an instant copy of the files that you just downloaded as a back up.

In case you accidentally delete some of the code line, then you can delete the version you are working on and start over with a new copy, or correct the code line by referring to your print copy.

•• WHICH FILES YOU NEED TO EDIT

All files inside "txt" folder.

•• PROCEDURES ON HOW TO EDIT THE TEMPLATE

We are assuming that you know basic computer skills such as going back and forth between windows.

Double click the "txt" folder and you will see a number of text files.
These files consist of information that will be loaded to the flash file (look for the starburst icon).
Use your print out of ReadMe file for reference while you edit.

Double click "index.html" and keep it opens.
The purpose is to preview the change that you will make.

LET'S START EDITING! -----

•• NAME YOUR NAVIGATION BUTTONS ("YOURCOMPANY", "Directory 1,2,3,4 and 5")

I highlighted with RED what we are going to change.
You will change the name of the company and the 5buttons.

Double click "directories.txt" (inside the txt folder)
It will open your computer default text editor.

You will see the code lines

```
&yourcompany=<P ALIGN="RIGHT"><FONT FACE="Helvetica" SIZE="22" COLOR="#CCCCCC"><A  
HREF="http://www.5sec.com" target="_top"><B>YOUR COMPANY</B></A></FONT>  
&Button1=<P ALIGN="RIGHT"><FONT SIZE="11" COLOR="#CCCCCC"><B>Directory 1</B></FONT>  
&Button1over=<P ALIGN="RIGHT"><FONT SIZE="11" COLOR="#FF3300"><B>OnMouseOver</B></FONT>  
&Button1click=<P ALIGN="RIGHT"><FONT SIZE="11" COLOR="#FFCC00"><B>OnMouseClicked</B></FONT>  
  
&Button2=<P ALIGN="RIGHT"><FONT SIZE="11" COLOR="#CCCCCC"><B>Directory 2</B></FONT>  
&Button2over=<P ALIGN="RIGHT"><FONT SIZE="11" COLOR="#FF3300"><B>OnMouseOver</B></FONT>  
&Button2click=<P ALIGN="RIGHT"><FONT SIZE="11" COLOR="#FFCC00"><B>OnMouseClicked</B></FONT>  
  
&Button3=<P ALIGN="RIGHT"><FONT SIZE="11" COLOR="#CCCCCC"><B>Directory 3</B></FONT>  
&Button3over=<P ALIGN="RIGHT"><FONT SIZE="11" COLOR="#FF3300"><B>OnMouseOver</B></FONT>  
&Button3click=<P ALIGN="RIGHT"><FONT SIZE="11" COLOR="#FFCC00"><B>OnMouseClicked</B></FONT>  
  
&Button4=<P ALIGN="RIGHT"><FONT SIZE="11" COLOR="#CCCCCC"><B>Directory 4</B></FONT>  
&Button4over=<P ALIGN="RIGHT"><FONT SIZE="11" COLOR="#FF3300"><B>OnMouseOver</B></FONT>  
&Button4click=<P ALIGN="RIGHT"><FONT SIZE="11" COLOR="#FFCC00"><B>OnMouseClicked</B></FONT>
```

&Button5=<P ALIGN="RIGHT">Directory 5
&Button5over=<P ALIGN="RIGHT">OnMouseOver
&Button5click=<P ALIGN="RIGHT">OnMouseClicked

**DON'T GET PUT OFF BY ALL THESE CODES.
PLEASE TAKE YOUR TIME.**

If you delete any of the characters by mistake, this is not going to work.

Change the texts

YOUR COMPANY (the one with CAP, look for YOUR COMPANY, colored red)

... to **MY COMPANY**

Directory 1 to **HOME**

Directory 2 to **ABOUT ME**

Directory 3 to **SERVICES**

Directory 4 to **PORTFOLIO**

Directory 5 to **CONTACT ME**

" OnMouseOver " and **" OnMouseClicked "**

Change these texts to any thing you want and you will see the effect when the mouse over the button and when you click the button.

If you don't want this effect, insert the exact word that you insert for **Directory 1, 2, 3, 4, 5.**

**BE SURE! Don't delete these characters ** when substituting your own text.

Save the **"directories.txt"** (go to file and hit "Save")

Go to your browser of index.html and **" Refresh "** (located at the navigation bar of your browser)

Do you see the change you wanted? If not, you must have deleted one or more of the code characters.

Go back to **"directories.txt"** refer to your print out copy and see which character or characters that you have deleted and replace them.

Save and Refresh your browser, each time you make a change to the code line.

•• MAKE A CHANGE TO YOUR CONTENT PAGE

I highlighted with **RED** what we are going to change.

You will change the title and the content of Directory1.

Double click **"directory2.txt"** (inside the txt folder)

You will see this:

2. Make your change and **save**.
3. Upload that text file again
4. Refresh your browser. Voila!

YOU DON'T NEED TO REUPLOAD THE INDEX OR THE FLASH MOVIE.

These templates were designed to generate contents from simple text files, for ease of site updating.
All you need to update is the text file.

==---- LIMITATIONS REGARDING THE USE OF OUR FREE TEMPLATES ----==

Below are things that you won't be able to do with our FREE templates unless we tweak them:

1. Insert your own images or create tables.
2. Change the layout or logo, or add sub-links.
3. Create internal links inside the Flash movie.
4. Flash cannot generate images from a text file.
5. If you are using an older browser to preview these templates you may experience difficulties with the display of text. According to Macromedia, there are 414 million users worldwide whose browsers **CAN** display Flash files properly.

I will be updating this "**ReadMe**" file.

Please bookmark my site <http://www.5sec.com>, for any update.

I will announce when I have more step by step tutorials for a beginner on how to modify your text files (make your text bold, creating links, how to display special characters and so on).

Regards

Karna Saleh

Webmaster of 5sec INTERACTIVE
