## Troubleshooting

### **Why don't I hear any sound?**

First, verify that your sound card plays sounds with other programs. For instance, use Media Player, which comes with Windows 3.1 and Windows95, to play a .WAV file. If you still don't hear any sounds, refer to your sound card manual. Good luck.

### **I can't make the sound loud enough with the Volume control**

Many sound cards come with a Mixer program applet which allows the user to individually control the volume of various resources on the sound card, such as digital sound output channel, MIDI, AUX, etc. If your sound card has such a mixer, try to adjust the channel variously labelled: .WAV Output, Digital sound Output, or something similar. Also, usually one control is used to adjust ALL the sound outputs together. Play with both these controls to get the desired sound volume range.

## Advanced Topics

### How Does WaveSong Work?

WaveSong plays digitized sound files, similar to .WAV files. However, .WAV files can be very large, on the order of 1 Megabyte for a minute of sound. WaveSong files are just a few tens of kilobytes long, and sounds can play for long periods of time and still seem "fresh". The program "expands" the sound by doing obvious tricks such as jumping around within the sound file, looping on a sound segment, varying volume, etc., as well as certain proprietary techniques. We hope you enjoy these sounds, and we welcome suggestions for improvements and additions.

### Shortcuts and Expert User Info...

To toggle between Play and Stop, use the right mouse button. This is especially handy when the application is minimized: just right click on the icon.

WaveSong can accept a command-line switch to begin listening immediately. This is useful to start up WaveSong from some other program like a Windows-batch utility or time-scheduler. If this filename argument is present, WaveSong starts playing immediately after initialization. The command invocation looks like:

```
<path>\wavesong /P
```

## Registration and Support

If you have already paid for any version of this program, and need a registration code for future updates, go to UPDATES.

If you have not purchased this program, you may use WaveSong for 30 days. If you wish to use this product beyond the 30 day trial period, you must register.

## HOW TO PURCHASE

Purchasing WaveSong gives these benefits:

- You will receive a registration code, by e-mail if possible, which will instantly convert your program into Registered Mode, disabling all registration reminder features. This registration code will be good for several updates, so you can easily continue to obtain improved versions of the program via the Internet or other distribution channels. The latest versions of our programs may always be found at <http://www.sagebrush.com/~sells/>
- You will receive the latest and greatest version of this program, if needed.
- Several free updates for Windows95 versions of this program. (Modest shipping charge if needed.)
- Several free updates for Windows 3.1 releases of this program. (Modest shipping charge if needed.)
- Free mail support, and free e-mail support at [sells@sagebrush.com](mailto:sells@sagebrush.com) .
- E-mail upgrade announcements and new product announcements.
- Registration is the right thing to do. Registering allows us to continue upgrades to the program and introduce new products.

### Retail

Sagebrush programs may be available in retail stores in some areas, sometimes bundled with other software or hardware.

## More Neat Stuff

If you like this program (or even if you don't), be sure to check out these other software titles from Sagebrush Systems!

Programs are available from our Web site at

<http://www.sagebrush.com/~sells/>

and from ftp sites such as [ftp.winsite.com](ftp://winsite.com) and [ftp.simtel.net](ftp://simtel.net)

### WinChime for Win95 and Windows 3.1

Relax to the peaceful sounds of wind chimes, as simulated with the MIDI capabilities of your sound card. Sound parameters are easily changed to fit your particular mood. A built-in timer can control on and off events to keep sounds interesting. This is a gentle way to mask out unwanted noise in the home or office. Requires Windows 3.1

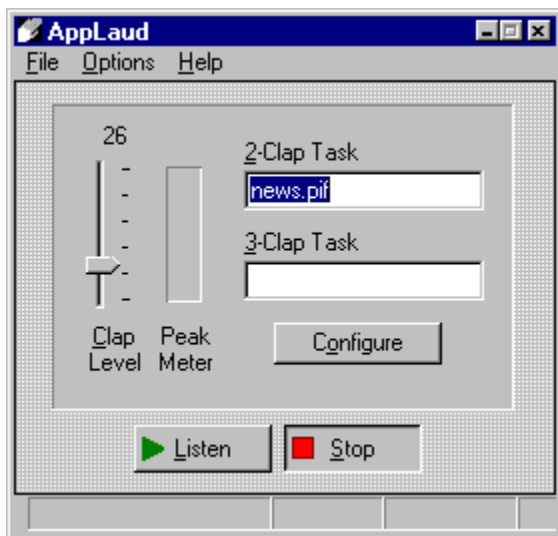

### MouSing for Win95 and Windows 3.1

Create eerie sounds by moving your mouse. This program is similar to a musical instrument called a Theremin, which responds to the musician's hand movements in the air near the instrument, but instead of detecting hand movements, we use a mouse. Movement in one direction changes pitch, and in another direction volume

### AppLaud for Win95 and Windows 3.1

Impress your friends! Turn your sophisticated multimedia computer into one of those gadgets-that-turn-things-on-and-off-by-clapping-your-hands. AppLaud runs in the background, monitoring your sound card microphone input and detecting the noise signature of clapping. Different programs can be launched for two-clap and three-clap signals. Sound card with Automatic Gain Control (AGC) microphone input strongly recommended.

### More great programs appearing soon!

We are currently developing more software applications for Windows 95 and Windows 3.1. For you Internet surfers, a WEB page is available at

<http://www.sagebrush.com/~sells/>

or you can email

[sells@sagebrush.com](mailto:sells@sagebrush.com)

to request for more details. Or better yet, register this software and get our latest product catalog and request to be on our e-mail or mail list for new announcements!

## Getting Started

Chances are, your system is already set up correctly for sound output if you have a sound card installed. Go ahead and try out WaveSong by clicking on the Play button. If you hear acceptable sound after adjusting the Volume slider control, you are all set! Otherwise, refer to the procedure detailed under "[Troubleshooting](#)".

## **Updates for Previous Purchasers**

If you have already paid for this product (either directly from Sagebrush, by retail purchase, or bundled with a hardware purchase) :

### **Thank you!**

You may continue to obtain several updates to the software by getting a Registration Code. This code allows you to use future versions of the program, available on the Internet or other distribution channels, without being bothered by registration reminder screens. The latest program version is always available on the World Wide Web, at <http://www.sagebrush.com/~sells/>

We have chosen the Registration Code method for updating programs, rather than sending out new Registered Program Disks for every major update, for your convenience, to keep shipping costs down and to reduce delays.

### **How to get a Registration Code**

If you obtained this program by retail purchase, mail in the registration card, with your Serial Number, and we will send your code. Non-USA customers allow several weeks delay.

Alternatively, e-mail [sells@sagebrush.com](mailto:sells@sagebrush.com) with your name, address, program name, program Serial Number, version number, date and store purchased.

Or, if necessary, send the above information by mail to Sagebrush Systems, PO Box 3094, Corrales, NM (USA) 87048.

If you purchased an earlier version of this program directly from Sagebrush, you won't have a serial code, but send the other information.
