General Overview

Coconuts is for musicians who learn how to play by listening to recordings. Coconuts will do the following:

- 1** Let you segment a recording into parts
- 2** Let you repeatedly play only a segment

Coconuts will work with CD's, MIDI files, or wave audio files. If you want to study a tape, first record it to a WAV file.

Step by Step Instructions for CD Audio

- 1** Put the CD in your CD-ROM drive
- 2** Choose CDAudio from the Device menu
- 3** Press the Play button
- 4** Mark the start of a segment by clicking in the first Start box
- 5** Mark the end of the segment by clicking in the first End box
- 6** Make a note to yourself in the first Comments box
- 7** Click the radio button by the first segment number you will hear the segment play repeatedly
- 8** Click the red radio button to resume normal play
- 9** Select SAVE AS from the File menu to save your work

Troubleshooting Tips

1 The START time must be later than the END time.
