Stone Studio™ Demo Script

Each subdirectory has some sample files and a demo "Read Me" but here's a Super Quick Demo of our applications:

Double-click StoneStudioDemo.mov to watch a demo movie!

1. Launch Create:

        i. drag in the maple leaf from **Tools -> Library Resources**, Art tab

        ii. resize it to be about half its original size

        iii. choose **Tools -> Animator**

        iv. click "Current"

        v. click Save and save the images

2. This launches GIFfun, which makes an animated image and further launches your web browser.

        i. In Create, delete the original mapleleaf

        ii. From GIFfun, drag the file icon into Create.

        iii. From Browser, drag "web address" onto graphic in Create

3. Launch SliceAndDice:

        i. choose **Samples -> Necco Bar**

        ii. Choose **File -> Save for Create**, and save

        iii. Drag window title bar document icon from SliceAndDice into Create

4. Launch PStill:

        i. choose **Conversion -> Sample**

        ii. Drag converted PDF Castle.pdf into Create

5. Launch PhotoToWeb:

        i. choose **Album -> Sample Album**

        ii. Click and drag out a crop area in the photo

        iii. Drag the icon of the palm tree in upper corner of photo names browser into Create

        iv. Add a new Page to Create by clicking page popup in lower scroll area and choosing Add.

6. Launch TimeEqualsMoney:

        i. Choose **File -> Sample Time Card**

        ii. Choose **Reports -> Invoice**

        iii. Click button "To Create®"

7. In Create:
   (optional: drag in a movie)
   i. Arrange graphics so that they do not overlap
   ii. Choose **Web -> Create Web Pages...**

8. Launch PackUpAndGo:
   i. drag the Web pages folder you created in 6.ii. into
PackUpAndGo
