Launch GIFfun and:

1. Sample:

Choose: "GIFs -> Sample"

Alter the timing on a frame, reorder the frames by dragging

Click "Make GIF" again to see the changes

2. Double-click "CautemocOverMexico.html" to see a neat GIF made by Steve Weintz in Create®.

3. Choose "GIFs -> Load Folder..." and select "WeDeliver.gifAnim"

Click "Make Gif" on the main window

4. Create has an "Animator" under Tools which will help you create frames for your animated gifs. When you drag an animated GIF from GIFfun into Create®, it gets used for web output.

Open LeafSpin.cre8 in Create

Choose Tools->Animator, Load... with leaf selected

Choose "Save Animation"
