

SUPER SCREEN SAVER

Welcome to The Media King's Super Screen Savers for Windows 95. This cd-rom contains over 300 high-quality, highly entertaining screen savers, with the purpose of saving your screen from dreadful burn-in. This cd-rom has been created with long file and directory names for ease of navigation. Due to the long file names and that most of these screen savers are 32-bit this cd-rom will not operate on any other operating system other than Win '95+.

The directories on this disc have been split up alphabetically from A to Z and a Utilities Directory. Under each main directory you will find many smaller directories with the name of the screen saver. (e.g. ..\S\Sample Saver) To operate the screen savers you will either have to run a installation program (e.g. Install.exe, Setup.exe, etc..) or copy the screen saver to you c:\Windows directory and set the screen saver up from the controll panel. (Display options)

For a quick listing of the directories (not including individual .EXE screen savers) look in the file "File_Listings.TXT" located in the root dir of this cd-rom.

*-Good Luck, and Happy Screen Saving!
