

WINGED WARRIOR II

The Winged Warrior has been summoned for another mission. He has been called to assist allies on a neighboring planet. An evil emperor has taken control of the planet and a small resistance has asked for help in regaining their planet. The King has called upon the Winged Warrior to go to the planet and restore peace.

Playing the Game

Your adventure begins in a forest where you search for the king. Talk to any guards you find in the forest in that they will provide you with useful information for your journey.

When you arrive on the alien planet, talk to everyone you see. They will help guide you along your way. Visit the shops in town to see what wares are available. Every town will have an inn that will provide you with the opportunity to save your game.

As you venture further on the planet, you will encounter those who are loyal to the Emperor. The only way to get past these enemies is to defeat them. You can attack using your sword or arm cannon. If you become weak in battle, repair your suit with an energy crystal. Energy crystals also replenish your cannon power. If you feel you are not ready to engage in battle at that time, you can run.

You become a powerful warrior by gaining experience through defeating enemies. If you find you are having difficulty defeating enemies, find some weaker enemies and defeat all you can find.

Continue your journey on the planet until you come face to face with the Emperor. It is up to you to confront this evil creature that has enslaved your alien allies.

Game Control

To move the Winged Warrior, use the control pad (arrow pad) on a gamepad or the stick on a joystick. If you are using a keyboard, use the arrow keys. To talk to people or open treasure chests, press a fire button on a gamepad or joystick or ENTER on the keyboard. When you are in battle, use your control pad (arrow pad) on your gamepad or joystick to toggle through your battle options and the fire button to activate your choice. On the keyboard, use the tab key to toggle and the ENTER key to make your selection.

Your joystick/gamepad will automatically be calibrated while the game is loading. Avoid pressing any buttons while the program is loading because this will interfere with the calibration and your joystick/gamepad will not work properly in the game.

If you experience problems with your joystick, try re-calibrating your joystick. Press the ESC key to bring up the menu. Select Information, then select Joystick Configuration.

If after re-calibrating your joystick you still experience problems, unplug your joystick and use your keyboard for control.

Character Status

If you press your right mouse button or the letter S on your keyboard, you will bring up the character status information. Below is a description of each of the items.

Level: As you gain experience, you will go up levels. As your level increases, you will have more hit points thereby making your sword and cannon more powerful.

Hit Points: This is the amount of damage you can sustain before you perish. The display shows your current amount of hit points as well as how many you would have if you were fully charged. If you totally run out of hit points, your game will be over. You can recharge your hit points by using a crystal.

Cannon Power: This is the amount power your cannon has. Your current power is displayed as well as the amount you would have if your were fully charged. Different cannons require varying amounts of cannon power to be used. You can recharge your cannon power by staying at an inn. You can increase your cannon power by increasing levels.

Attack Power: This is the minimum amount of damage you will take on enemies. The maximum amount of damage you will take will be no more than twice your attack power. You can recharge your cannon power by staying at an inn. You can increase your attack power by increasing levels.

Experience: As you defeat enemies, you will gain experience. The more experience you obtain, the more levels you will increase.

Next Level: This is the number of experience points you need to obtain in order to increase to the next level.

Crystals: This is the number of energy crystals you have. Energy crystals are used to repair your suit or replenish your cannon power. Your suit is what you use to stay alive. Therefore by repairing your suit, you recharge your energy.

Gold: This is the total gold you possess. Use gold to buy cannon attachments and energy crystals.
