Symptoms      : No Symptoms

Discovered    : 26-04-94

Way to infect: No infection

Rating        : Very Dangerous

Kickstarts    : 1.2/1.3

Damage        : Fastformat !!

Removal       : Delete Disk-Validator.

Comments      : This is another Disk-Validator "virus". The only thing
                it  does  is  to  format your disk. Imagine you have a
                good disk with this Validator on it.

                Now  it maybe will happen:  Your diskstrukture gets an
                error. If you are now inserting the disk, the AmigaDOS
                tries to load the Disk-Validator.  But this devil only
                formats your disk and show you an alert:

                Click on this gadget to see a  Demo  of the Loop Combo
                virus alert. Push left mouse button to return.
