THINKIN'
THINGS
COLLECTION 3

 EDMARK

Welcome to Thinkin' Things Collection 3

Thinkin' Things Collection 3 is the third in a family of Edmark products designed to exercise cognitive skills and promote intellectual growth. Designed for 7 to 13 year olds, *Thinkin' Things Collection 3* develops problem-solving skills, introduces computer programming, and explores simple physics concepts including friction, gravity, motion, and inertia.

Thinkin' Things Collection 3 is brimming with rich learning opportunities for children, working on their own or with you as a "learning partner." Encourage children to show you the work they create and the challenging problems that they have solved. You may notice strength in deductive reasoning in Stocktopus and Fripple Place, development of spatial and sequential thinking in Half Time, and an aptitude for conducting experiments and predicting results in Carving BLOX. In all Thinkin' Things experiences, self-confidence is enhanced, and persistence is rewarded with success.
