Thank you for trying SHOWCARD, a utility that makes it easier to view and print Windows© CardFile© information. This is the latest version of SHOWCARD(2.0). Some of the improvements are:

- 1) Improved interface (it's prettier)
- 2) Find and re-find menu items
- 3) Support for OLE-linked files (SHOWCARD, version1 did not recognize these files as CardFile© files).
- 4) A bit faster and accepts slightly larger files

This archive should include the following files:

CMDIALOG.VBX
README.WRI (this file)
SHOWCARD.EXE

To install Showcard, copy the file SHOWCARD.EXE to its own directory. Then copy the file CMDIALOG.VBX to your WINDOWS\SYSTEM directory.

IMPORTANT: YOU MUST ALSO HAVE A COPY OF VBRUN300.DLL IN YOUR /WINDOWS/SYSTEM DIRECTORY. This is available on most BBS' and from Compuserve, etc.

Please try the product for 30 days. If you like it, please send \$15 to the above address, if not please delete it from your computer. Thank you, Jeff Zuckerman
