The image shows a screenshot of a video editing software interface. At the top, there is a status bar with the text "8 BHz \ 33'020 KHz" on the left and a time display "0:00 45:34" on the right. Below this is a "Controls" panel containing various buttons for playback (stop, play, pause, next) and editing (undo, redo, delete, copy, paste). A "Navigation" panel is located on the left side, featuring three vertical sliders. The main workspace is divided into three horizontal tracks: the top track shows a video waveform, the middle track shows an audio waveform, and the bottom track shows a sequence of video frames. A timeline at the bottom of the workspace has markers at "0:01", "0:05", and "0:09". At the very bottom, there is a system tray area with the text "Navigation \ 0:00:00" and a progress indicator.
