- DGR PCI Ultrastar 4.0
- MacProducts PCI Magic RAID
- Optima NuBus DisKovery 4200W
- Power Mac 9500 internal SCSI

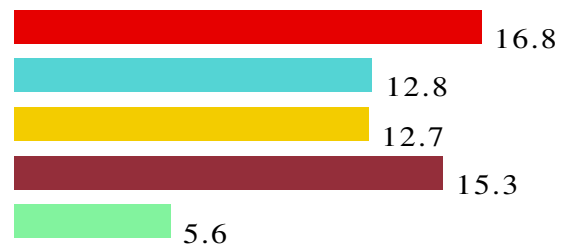

Disk Mix

(All results in relation to a Quadra 630, which receives a score of 10; higher is better.)

1-Mbyte Sequential Write

(All results in Mbytes per second; higher is better.)

The Optima DisKovery 4200W was tested on a Power Mac 8100/80 with 32 Mbytes of RAM running System 7.5.1. The PCI card testing was on a Power Mac 9500 with 32 Mbytes of RAM running System 7.5.2. Both machines had virtual memory off and the disk cache set to 96 Kbytes. The Optima and MicroNet were tested with a Seagate 3.5-Gbyte drive array. The DGR Ultrastar 4.0 and MacProducts Magic RAID were tested with an IBM 3.9-Gbyte array. The Power Mac 9500 internal SCSI was tested with the Mac's internal Seagate 2-Gbyte hard drive.
