

NETBENCH 4

Fast Ethernet cards

(All results in Mbps; higher is better.)

- Built-in Ethernet on 7500
- Asanté PCI
- Farallon PCI
- Farallon NuBus

All PCI cards were tested on a Power Mac 7500/100 running System 7.5.2; NuBus cards were tested on a Power Mac 8100/100 running System 7.5.2. All Macs used Open Transport 1.0.6. Tests were run over AppleTalk through a hub to a 90-MHz Pentium server running NetWare 3.12 and a Fast Ethernet PCI card.
