

COVERING ALL THE BASES

Fore Systems' all-encompassing product line lets you implement ATM at all levels of your network.

Ethernet, Token-Ring, or FDDI client

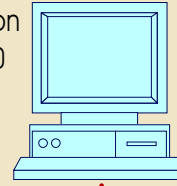

Existing Ethernet, Token-Ring, or FDDI networks can access an ATM network via the LAX-20.

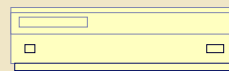

LAX-20 LAN Access Switch

Windows NT Workstation 3.5

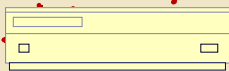

Windows NT Workstation 3.5 clients with ESA-200 adapters can attach directly to an ASX-200 switch.

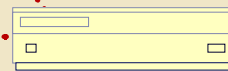

The ASX-200 can house backbone modules for fiber TAXI (100 Mbps) as well as both fiber and UTP SONET (155 Mbps).

ASX-200 ATM Switch

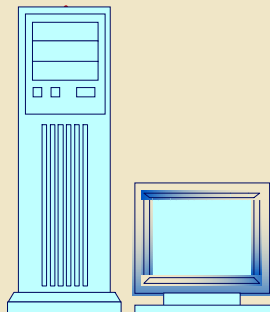

ASX-200 ATM Switch

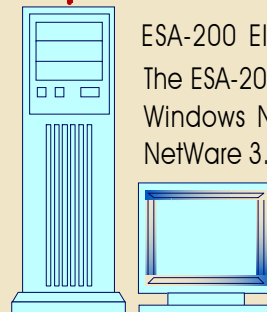

ASX-200 ATM Switch

The ForeThought software, which includes LAN Emulation and Signaling, keeps everything working.

Windows NT Server 3.5

ESA-200 EISA adapter
The ESA-200 has drivers for Windows NT Server 3.5 and NetWare 3.x/4.x

NetWare 3.x/4.x server
