

HPFS HELPS MOST AT LOW-MEMORY CONFIGURATIONS

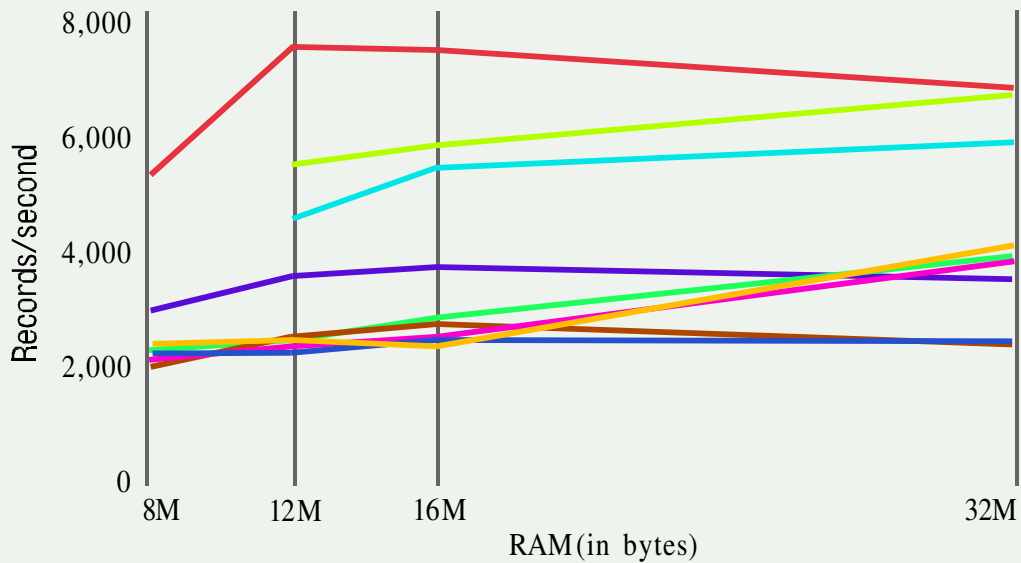

IBM

- OS/2 2.11 using FAT
- OS/2 2.11 using HPFS
- OS/2 Warp 3
- OS/2 Warp 3 with Win-OS/2 using FAT
- OS/2 Warp 3 with Win-OS/2 using HPFS

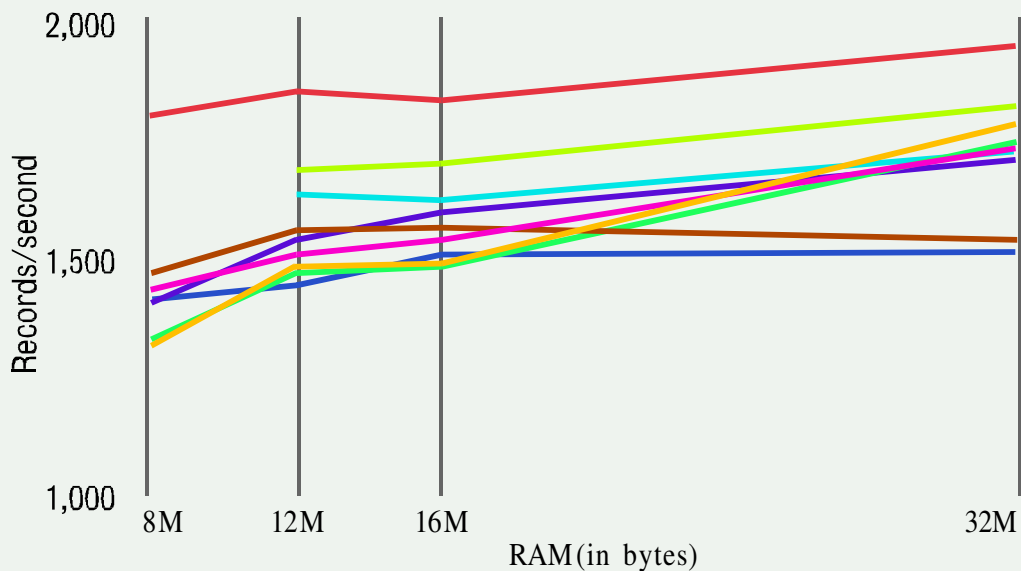

Microsoft

- Windows 3.11
- Windows for Workgroups 3.11
- Windows NT 3.5 using FAT
- Windows NT 3.5 using NTFS

Import test: Warp's HPFS performance slows at 32M bytes

Index test: Simpler FAT system always faster at 32M bytes

Note: Windows NT 3.5 was tested starting at its minimum memory configuration of 12M bytes.
