

POWERBUILDER ENTERPRISE 4.0 DELIVERS FASTER EXECUTION OF CLIENT/SERVER APPLICATIONS

Team Enterprise Developer 2.0 offers speedier development times

Measured in seconds. Shorter bar indicates better performance.

- 1) The two-table screen I/O test measures how long it took each product to display a screen with data.
- 2) The three-table report execution test measures how long it took each product to create a three-page report to print to a spool.
- 3) The 500-iteration loop test measures how long it took each product to cycle through an empty loop 500 times.
- 4) The 500-element loop test measures how long it took each product to loop through an array while displaying the array element.
