MAKING THE SPLIT

Client:

GUI

Application Logic

Communications

Client technology:

Windows, NT, C, C++, Visual Basic

RPC
ODBC
TCP/IP

Server:

Communications

Application Logic

RDBMS

Operating system

Server technology:

Server technology: C, Sybase, Oracle, AIX, Digital Unix, Solaris, HP/UX.

Dodge Group's OpenSeries financial suite splits application processing between the client and the server, off-loading high-volume processes to the back-end server.
