

# DELPHI AND WINMAKER PRO SPEEDPAST VISUAL BASIC 3.0

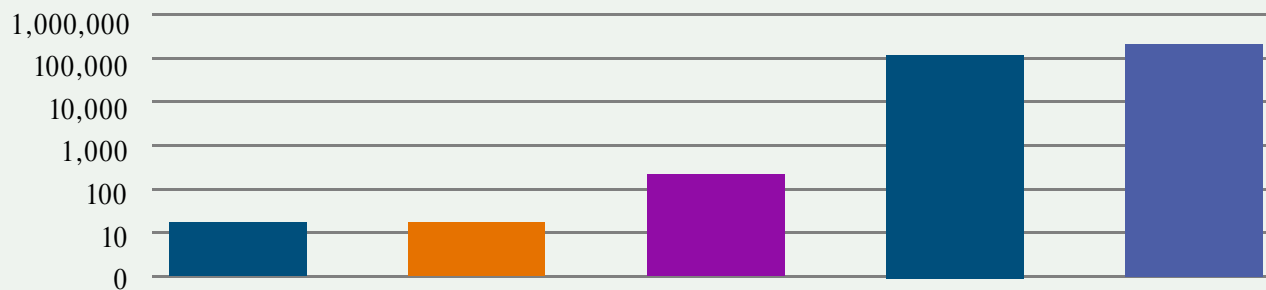

All three products surpass performance of Powersoft's and Symantec's programmable front-end tools

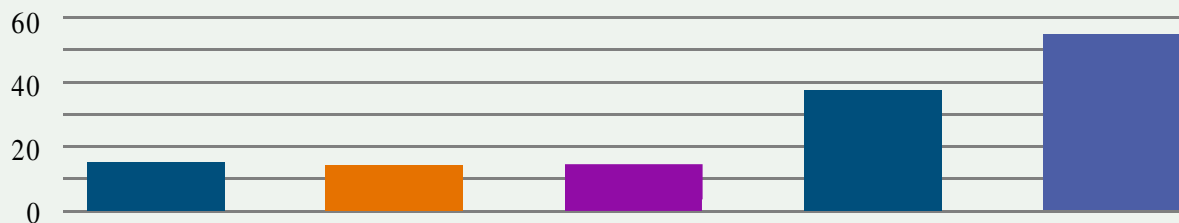

Measured in seconds. Shorter bar indicates better performance.

Empty loop iteration test

Array data-display iteration test

Test results for Symantec and Powersoft products, previously published on March 20, were adjusted in keeping with more intensive test procedures. See Test Methodology, Page 74, for more details.
