

THE QUEST FOR PORTABILITY

One Up Corp.'s porting tools

SizeUp: Tool for estimating number of APIs that need to be changed in porting applications.
Availability: Q2/ Q3

Accelerator: Extensions to the current SMART 2.0 porting tool that will provide 90 percent out-of-the-box portability.
Availability: Q2/ Q3

Progress: Tracking tool for monitoring programmers' progress on a daily basis.
Availability: Q2/ Q3

Automated testing tool: Will be released in partnerships with automated test vendors.
Availability: Q4

Additional "Commander" tools: New tools for moving applications from 16- or 32-bit OS/2 to Windows, Macintosh, Unix, and midrange operating systems. Tools also ultimately will let developers move from any target to any host and will support COBOL, object-oriented, and other languages.
Availability: Beta in Q4, commercial release in 1996
