THE INS AND OUTS OF DSMN

NetWare 2.x/3.x servers

BDC**

Windows NT Server 3.51 domain

PDC*

BDC**

BDC**

*Primary Domain Controller   **Backup Domain Controller

After importing NetWare 2.x/3.x binderies into the Windows NT domain, Microsoft's Directory Service Manager for NetWare can only propagate subsequent account modifications outward from the domain. LAN administrators must therefore refrain from making any changes via Novell Inc.'s SYSCON.
