FARSITE, LIVESHARE TIE UP NETWORK TRAFFIC

TalkShow and Insitu make more efficient use of network bandwidth

Tests measure packets transmitted over the LAN for each task. Shorter bar indicates better performance.

DataBeam FarSite 2.0 Corporate Edition · FutureLabs TalkShow 3.02 · Insitu Conference 1.0d · PictureTel LiveShare Plus
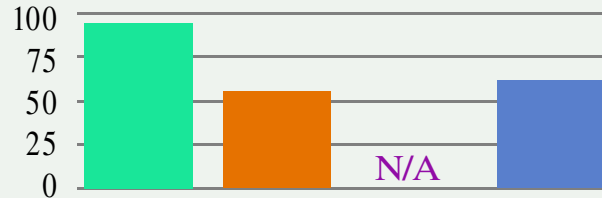

1. Maintain connection

Packets generated to maintain a connection between two PCs with synchronized whiteboards. Traffic measured over a 1-minute period, with no annotation activity.
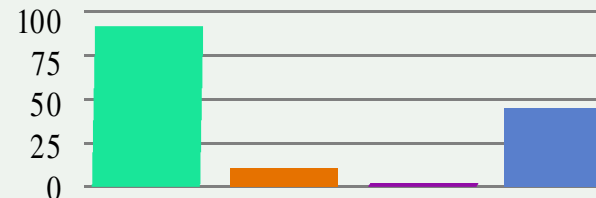

2. Circle annotation

Packets generated when using circle tool to create a circle on one whiteboard.

3. Cursor movement

N/A

Packets generated when moving cursor across screen of one whiteboard.

4. Text annotation

Packets generated when entering "This is a sentence of text" as an annotation on one whiteboard.

*Insitu does not include a remote pointer tool.
