

ISDN SERVICE MEDIA ACCESS DEVICES

Inexpensive routers and a new class of modem widen options for high-speed ISDN telecommuting.

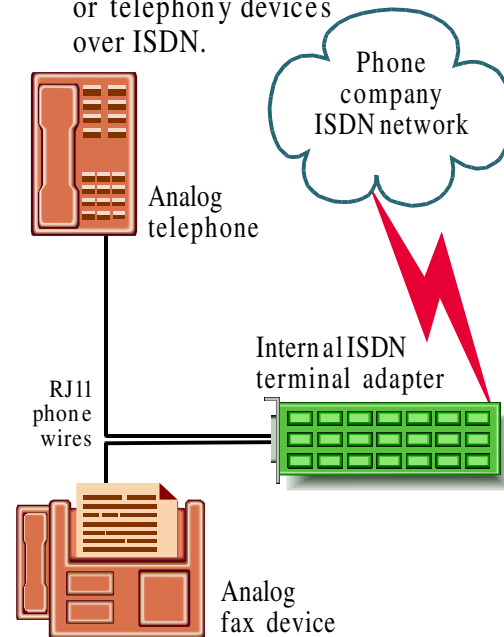

ISDN modems

- ▶ Work with serial ports.
- ▶ Support traditional analog modem AT commands.
- ▶ Can have built-in analog fax/modem capabilities.
- ▶ Active ports for analog fax telephony devices or over ISDN.

Traditional TAs (ISDN Terminal Adapters)

- ▶ Internal PC device can run at full 128K-bps ISDN speeds.
- ▶ Uses NDIS/ODI network drivers, such as LAN cards.
- ▶ Active ports for analog fax or telephony devices over ISDN.

ISDN routers

- ▶ Requires network card in PC.
- ▶ No special configuration of PC necessary.
- ▶ Can run at full 128K-bps ISDN speeds.
- ▶ Can have ports for analog fax or telephony devices over ISDN.
