

1. Configure the migration utility

Working directory: C:\MIGRATE
Error/warning action: Pause after errors and warnings

2. Define the Netware 3.X source server

Server: SERUITUDE
Information to migrate: All information
Source volumes to migrate: <Volumes selected>

3. Define the Netware 4.X destination server

Server: WORLD_OF_PANTS
Volume destinations: <Destinations specified>
Passwords: Assign no passwords

Press the down arrow key to accept the default, or press <Enter> to edit the path where migration reports and the intermediate file will be stored.
