

BizWiz(tm) - Business/Financial Calculator  
for Microsoft(R) Windows(tm) 3.1 or later  
Version 3.0 - Shareware Edition  
Copyright(c) 1991-1993 by CalcTech Inc.

BizWiz is an "power user's" financial calculator which emulates the famous Hewlett-Packard HP-12C.

BizWiz incorporates a useful "Keep-On-Top" feature which allows it to remain on top of other Windows applications.

In "Windows 3.1 Secrets" (ISBN 1-878058-43-6), author Brian Livingston writes: "Replace the Windows calculator with a really useful one like BizWiz".

To install BizWiz:

1. Insert this diskette in a floppy drive.
2. If not already running Microsoft Windows, start Windows.
3. From Program Manager, select Run from the File menu.
4. Type a:install (or b:install) and press [ENTER]
