Indy Tracks

Bienvenue dans la doc amigaguide dont voici l'[auteur](#).

Il y a à quelquepart dans ce guide un bouton qui lance le script d'installation.

Mais bon, pour que l'installation puisse se faire, il me faut savoir où se trouve XtremeRacing sur votre disque dur (logique :).

Donc avant toute chose, faites un assign "XTR:" du répertoire contenant XtremeRacing.

En guise d'introduction, vous pouvez lire le fichier [Track.readme](#).

Mais bon, comme c'est assez barbant, vous pouvez tjrs passer directement à l'[installation](#).

Indy Tracks

Welcome to this Amigaguide doc. See the [author](#).

There is, somewhere in this doc, a button who start an installation script.

But if you want the installation success, I have to know where is your XtremeRacing directory (logical, isn't it ?).

So you have to make a "XTR:" assign of your XtremeRacing directory before doing anything else.

The file [track.readme](#) is like an introduction.

But you can also directly go to the [installation page](#).

8 Mo Fast RAM

HD 850 Mo

A Joypad and a mouse :)

1.5 installation français

Vous pouvez tout simplement lancer "Installation script ou appuyer sur ce bouton.

Mais si vous préférez tout faire à la main...

Copiez le contenu des différents répertoires excepté pour MyBestLaps dans les répertoires du même nom.

Lancez l'outil "BestLaps" donné avec XtremeRacing (il peut porter un autre nom chez vous, c'est à vous de voir).

Allez chercher le fichier .laptimes qui se trouve dans le répertoire MyBestLaps de cette archive.

Si tout se passe bien, vous avez devant vos yeux mes temps sur les différents circuits que je possède (mes temps et ceux de quelques copains :).

Vous n'avez plus qu'à "merger" ces temps avec votre .laptimes :) (notez que ceci n'est pas fait par le script d'installation, des fois que mes temps ne vous intéressent pas et que vous ne vouliez pas faire un merge).

1.6 english installation

You have only to launch The "Installation.script"

You can also push this button

But, if you prefer make the installation yourself...

Copy the contents of the directories (except for MyBestLaps) in the directories who have the same name.

Launch the "BestLaps" utility who is given with XtremRacing (he could be called differently, its your problem ;-).

Load the .laptimes file who is in the MyBestLaps directory of this archive

If all has gone well, you have my best laptimes before your very eyes.

You can now make a merge (note that this thing isn't maked by the installation script).
