

INSTALLATION INSTRUCTIONS for CONVERTER PRO 95/NT

This is a special version of Converter Pro that does not include the Visual Basic 5 runtime files. In order to install Converter Pro 95/NT you must make sure that the VB 5 runtime files are installed on your computer. You can check in your Windows\System directory for the presence of the file Msvbvm50.dll. If it is there, then the VB 5 runtime files are most probably already resident on your computer. If it is not there, you must download the following file from the Internet:

<http://www.simtel.net/pub/simtelnet/win95/dll/vb5rtsp3.zip>

Following the download please unzip vb5rtsp3.zip in a folder of your choice. Then please read the file **readme.txt** for installation instructions.

Once you have installed the VB 5 runtime files on your computer, you can go ahead and install Converter Pro 95/NT. Run **sucon.exe** for this purpose.
