This option has not been made available. If there appears to be enough interest I will make it available in a future version.

Note: Only Hayes and Hayes Compatibles are supported.

1-Select Human Opponent(Modem) in the project menu

2-Get on the phone with your opponent to verify setup; make sure that one computer is set for the Orignate and the other for the Answer mode, and make sure that both are set for the same modem speed (bps)

3-Both players hang up the phone and click on "Click to Connect"

4-Enter the phone number if you are in Orignate mode

5-When requested, Enter your name and press return

6-Click on your die

7-Have fun

Press the F1 key to send a message to your opponent. Press the return key after you type your message to send it.

Function Key summary
