\*\*\*\*\*

Te ayudare a **recorder** la cantidad a indoctos si releesme bien.

Eyclopedia Universal Ilustrada (article: 'Mnemotecnia') =  
Gardner I, p. 98

Editor's Note:

Read: **recorder** --> recordar

Translations / Comments:

First, I correct the spelling:

"Te ayudare a recordar la cantidad a indoctos si releesme bien."

"If you reread me carefully, I will help you to remember the amount of uneducated people."

But it is incorrect, it might be 'la cantidad de indoctos'

From: Frederic Udina

"Te ayudare' a recordar la cantidad a indoctos si releesme bien."

The apostrophe meaning a grave accent on the final "e" of the second word.

"I'll help you recall the illiterate (ones) of this number if you re-read me correctly."

Actually the next-to-last word should be "me relees" instead of "releesme", but that's a minor license to make the mnemonic work.

From: Antonio Bouzas
