HARD DISK TOOLKIT•PE™

Simplifies disk management.

*Announcing the fastest way to simplify disk management for your Macintosh®, Power Macintosh™, and Mac™ OS compatibles. Hard Disk ToolKit•PE™ offers universal SCSI and IDE compatibility in a single unified utility. **Auto-Initialize** formats, tunes, and mounts any drive in one easy step. **Security** offers easy-to-use password protection for all your valuable data. **Hard Disk ToolKit•PE**—the one disk utility for all your needs.*

- One Step Disk Configuration
- One Pass Data Protection
- One Disk Utility for All Your Needs

Convenient applet makes mounting any drive a snap!

Designed for Easier Disk Management

An all new user interface makes disk management easier than ever before. The new **Auto Initialize** feature automatically installs a driver,

formats, partitions, tunes, names, and mounts your drive in one easy step. **Drag and Drop** support, 3-D icons, and online help make device control a breeze. The “friendly takeover” feature updates most drives without reformatting. There are also powerful tools for advanced configuration including resizable partitions and custom driver settings.

Powerful Security Made Easy

Get the maximum protection with minimal effort. The **Security** feature provides bullet-proof passwords to guard your valuable data. A built-in diagnostic tool finds and corrects bad blocks of data in one, easy pass. No matter which way you slice it, your data is always safe.

The Easiest Way to Improve Compatibility

Eliminate driver conflicts when you standardize on the #1 disk utility for the Mac. Over 800 different IDE and SCSI disk drives are individually tuned, tested, and supported by the ToolKit—including all Zip™, Jaz™, SyQuest™, Optical, Fast/Wide, and Ultra SCSI hard drives. One easy-to-use disk management package for all your storage needs.

**1 in Storage Management.*

“Everything you really need is here.”

3 WAYS TO SIMPLIFY DISK MANAGEMENT

- **Auto Initialize**—
One Step Disk Configuration
- **Security**—
One Pass Data Protection
- **SCSI/IDE Support**—
Universal Disk Management

Intuitive interface includes **Button Bar** for easy operation.

Protect data with bullet-proof passwords.

Universal SCSI/IDE support.

Auto Initialize any drive in one step.

Find and fix problems in one pass.

Built for Universal Device Support

- Format, partition, and test any drive.
- Supports over 800 different SCSI/IDE devices.
- Create large volumes (up to 2,000 GB).

Tuned for Performance

- Optimized for System 7.5.5.
- Enhanced with PowerMac "Native" drivers.
- Streamlined for automatic loading of 68K drivers on older Macs.

Designed to Support

- Fast ATA and SCSI devices.
- DMA, PIO mode 4, and Read/Write Multiple.
- SCSI Manager 4.3, Disconnect/Reconnect, and asynchronous I/O.
- Latest Technology—Ultra, SSA, Fast/Wide, and SCSI-3.

Simplified for Easier Use

- New user interface.
- One Button **Auto Initialize**.
- Driver installation without reformatting.
- "Drag-and-Drop" support.
- Cool 3-D icons.
- On-line help.

Recommended for PowerBooks

- Supports the new IDE DynaMO™ drives.
- Supports PowerBook™ media bay.
- Supports sleep mode for PowerBooks and 7.5.3 Macs.

System Requirements

- System 7.0.1 or higher
- Macintosh "020" CPU or higher (Does not support Macintosh Plus, Classic, SE, or Portable.)
- 4 MB available RAM
- Hard disk

"Among formatting products, FWB's Hard Disk Toolkit wins hands down."
—Macworld

"FWB's user guide and formatting manual are exceptional."

#1 in Storage Management.

CD-ROM TOOLKIT™

Supercharges CD-ROM performance.

Announcing the easiest way to squeeze extra speed out of your CD-ROM drive for Macintosh®, Power Macintosh™, and Mac™ OS compatibles. CD-ROM Toolkit™ uses small amounts of RAM and disk space as a cache to dramatically accelerate CD-ROM performance. High speed device drivers support DVD and all popular CD-ROM drives. Customize audio playback with CDT Remote™ and CDT Equalizer™. CD-ROM Toolkit—the only CD-ROM utility you'll ever need.

Intelligent Caching

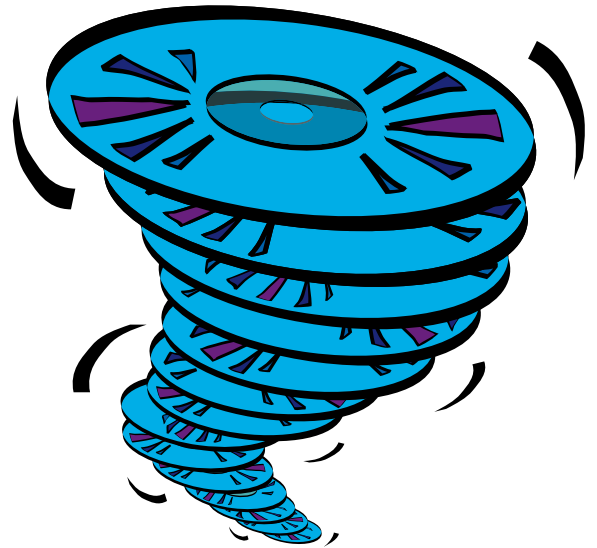

Create and edit custom cache “templates” for faster CD-ROM access. Save different templates for all your favorite titles. FWB's exclusive Cache-on-Demand™ technology loads your optimized cache settings “on-the-fly”. Transparently, you're using idle RAM and disk space more efficiently—boosting CD-ROM performance! The Toolkit even includes pre-configured cache settings for today's most popular titles.

High Speed Device Drivers

Designed to support virtually every CD-ROM drive available, the Toolkit's “hand tuned” drivers are optimized for Mac™ OS 8.0, PCI, and SCSI Manager 4.3. It includes everything needed to mount DVD-ROM, HFS, ISO, Photo CD™, CD Extra™, and CD-R discs.

“Real-World” Benchmarks

Fine-tune CD-ROM performance and measure the results instantly. The Toolkit transparently gathers vital statistics including *Cache Hits from RAM*, *Cache Hits from Disk*, plus *Overall Speed-Up* for “real-time” performance tracking.

- Accelerate CD-ROM Performance
- Customize Audio Playback
- Supports DVD and All Popular CD-ROM Drives and Formats

Customize Audio Playback

Use CDT Remote™ to create and edit custom play-lists for all your audio CDs. It's fully compatible with Apple's audio player and play-list format, and includes CD+G viewer and CD Extra™ support. Save 16 bit stereo AIFF files directly to your hard disk with the digital audio extraction feature. And now with the new CDT Equalizer™, you can even optimize playback according to your taste in music.

Drag and Drop tracks in preferred order for truly easy listening.

CDT Equalizer customizes audio playback.

*1 in Storage Management.

3 WAYS TO OPTIMIZE CD-ROM PERFORMANCE

- **Cache-On-Demand™** — Accelerates Performance Up To 1000%.
- **Real Time Benchmarks** — Track & Tune CD-ROM Performance.
- **Customize Audio Playback** — Create and Save Custom Play-lists.

A screenshot of the CD-ROM Toolkit main window. It shows a list of CD-ROMs with columns for 'Smart' and 'Fast' options. Callout boxes point to various features: 'Easily create and edit your own custom settings.' points to the 'New', 'Remove', 'Rename', and 'Setup' buttons; 'Customize settings for different drives or individual CD-ROMs.' points to the list of CD-ROMs; 'CDTcache™ includes optimized templates for today's most popular titles.' points to the 'Smart' and 'Fast' checkboxes; and 'Use idle RAM and disk space to speed CD-ROM.' points to the 'CD-ROM Toolkit' logo.

Completely configurable and easy to use.

A screenshot of the 'Drive Setup' window in CD-ROM Toolkit. It shows settings for 'Dynamic RAM cache' (512k), 'Static RAM cache' (128k), 'Static Disk cache' (3000k), and 'Remember Static Images' (1). Callout boxes provide details: 'Prescan caches the data used most often.' points to the 'Prescan' icon; 'Intuitive Mouse-Help throughout.' points to the 'Default', 'Cancel', and 'OK' buttons; and 'Read-Ahead speeds system response by reducing search times.' points to the 'Read Ahead' icon.

Recommended For All Apple Drives!

- Use idle RAM and disk space to speed your CD-ROM.
- Re-use previously cached data automatically.
- Get faster reads, seeks, searches and file opening.
- Improves performance of multimedia, database, shareware, and entertainment CDs.
- Enhanced support for Powerbook CD-ROM drives.

Special Support for CD-Recordable

- Supports CD recorders as readers.
- New "sleep-mode" eliminates conflicts with Mastering Software.
- Even identifies and mounts flawed CD-R discs!

Built For Universal Compatibility:

- DVD-ROM Support†.
- CD-ROM jukebox support.
- HFS, ISO, Hybrid, Mixed Mode, and MS-DOS CDs.
- Multivolume, Multisession, and Photo CD™.
- CD-R media, CD+G, ActiveAudio™, and CD Extra™.
- Power Mac "Native" driver and application.
- Import data from popular Internet databases of CD and song titles.

Cache-On-Demand™

- Create and edit custom cache templates.
- Custom settings "Hot-Load" automatically.
- Includes dozens of templates for today's popular titles.

Test and Tune all your CDs

- Identify optimum cache settings with precise benchmarks.
- Measure "cache hits" and "sustained data transfer rate."

System Requirements:

- System 7.0.1 or higher
- Macintosh "020" CPU or higher
- Hard disk
- SCSI CD-ROM drive

HARD DISK TOOLKIT™

Maximizes disk performance.

Announcing the most powerful yet easy-to-use disk management system for your Macintosh®, Power Macintosh™, and Mac™ OS compatibles. With the industry's only Power Mac native device driver, Hard Disk ToolKit™ accelerates and optimizes the performance of over 800 different SCSI and IDE devices including Zip™, Jaz™, SyQuest™, MO, and virtually every disk drive available. And, with Auto Initialize, formatting, tuning, and mounting your drive is easier than ever before. Hard Disk ToolKit—the one disk management package for all of your storage needs.

- Fastest I/O for Mac™ OS
- Supports HFS Plus Volumes
- One-Step Disk Configuration
- Advanced Security Features

Built for Performance

Get the fastest data transfers possible when you replace your drive's original software with Hard Disk ToolKit. It's completely "native" and optimized for Power Macs, PCI, IDE, and HFS Plus Volumes. Use the powerful SCSI Configure™ to customize your drive's performance, then measure the results with BenchTest™. Graphically sort and compare 10 critical measurements including average seek, average access, and sustained data transfer rate. Driver-level encryption and password protection provide rock solid data security.

Completely upgraded for easier disk management.

Performance Made Easy

Hard Disk ToolKit's streamlined user interface makes maximizing your disk performance easier than ever. It's packed with time saving features, including Auto Initialize, background formatting, and driver installation without reformatting. "Drag and Drop" support and comprehensive on-line help make Hard Disk ToolKit the most powerful and easy-to-use disk management software. And the new bootable CD-ROM provides everything you need to manage your drives on one convenient disc.

Compatible Performance

With over 850 SCSI/IDE devices supported, Hard Disk ToolKit eliminates troublesome Extension conflicts and removable cartridge problems for no-nonsense compatibility. Intelligent drivers and S.M.A.R.T. monitoring automatically detect, report, and fix drive defects and problems before they cause system down-time. For worry-free compatibility and ultimate performance, turn to Hard Disk ToolKit.

3 WAYS TO MAXIMIZE DISK PERFORMANCE

- **Supports Over 800 Devices**— Universal SCSI/IDE Support
- **Auto-Initialize**— One-Step Disk Configuration
- **"Native" Drivers**— Faster I/O for Mac™ OS

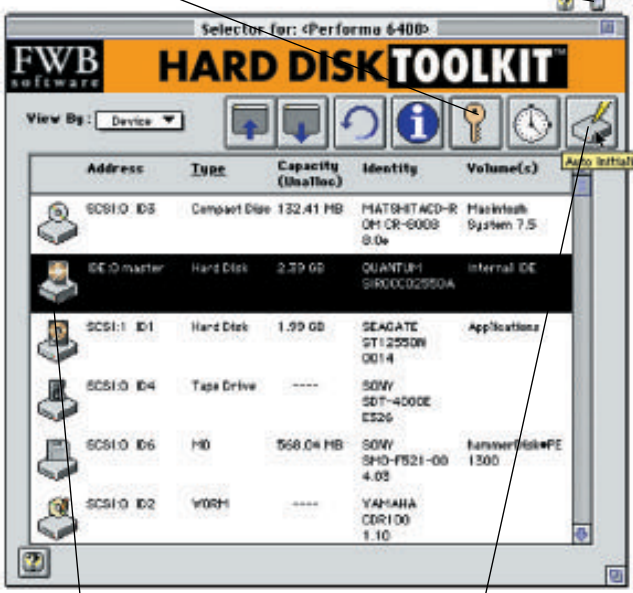

"Among formatting products, FWB's Hard Disk Toolkit wins hands down."
—Macworld

Protect data with bulletproof passwords and encryption.

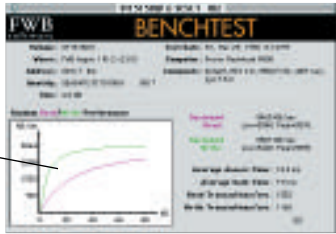

Switch to any application while formatting.*

Supports SCSI and IDE fixed, removable and optical drives.

Auto Initialize any drive in one easy step.

Track performance and compare results with enhanced BenchTest™.

Enhanced security features include three levels of encryption.

#1 Disk Management Software

- Format, partition, test, and mount any SCSI/IDE storage device.
- Find and fix disk problems.
- Create large volumes (up to 2,000 GB).
- Create HFS+ Volumes.

Tuned for Performance

- Optimized for Mac™ OS and the Power PC Platform.
- Enhanced with Power Mac "native" drivers.
- Custom templates tune performance for digital video and publishing.
- Faster system startup with TurboBoot™.

Track & Tune Performance

- Test drive performance with BenchTest™.
- Track, sort and compare BenchTest results.

Fortified to Secure Data

- Rock solid passwords and data encryption.
- High-speed disk cloning with Device Copy.
- Copy protection for files/folders.

Simplified for Easier Use

- Streamlined user interface.
- One Button Auto Initialize.
- Driver installation without reformatting.
- Comprehensive on-line help.
- "Drag-and-Drop" disk management.
- Cool 3-D Icons.

Enhanced Crisis Control

- Start-up diagnostics and S.M.A.R.T. drive monitoring protect data.
- Includes bootable CD for emergency situations.

Built to Support

- Fast ATA and SCSI.
- Multi-word DMA, PIO mode 4, and Read/Write Multiple.
- Ultra, SSA, Fast/Wide, and SCSI-3.
- 150+ low-level drive settings.
- Formats removables for DOS or Mac.

System Requirements

- System 7.5.3 or higher
- Macintosh "030" CPU or higher (no support for Macintosh Plus, Classic, II, LC, SE, or Portable)
- 4 MB RAM
- Hard disk
