

Trivia Script v2.0

Version 2.0 Adapted from version 1.1.0 by Kent Sorensen (kents@snak.com)

Support questions regarding version 2.0 must be sent to Kent Sorensen (kents@snak.com)

Version 1.1.0 By Bernard Chih-Hsun Yen (bernardy@usa.net -

<http://proverb.taiwanonline.org>). Bernard Chih-Hsun Yen does not provide support for version 2.0

Trivia

The files for the trivia script are found in the TriviaBot folder. The central files - trivia and trivia_question have also been duplicated in the Scripts folder so that you can simply type /load trivia to run the script.

Additional information is available in the Installation Instruction & Help folder inside the TriviaBot folder.

Trivia is one of the most popular uses for IRC and it is almost certain to draw a crowd. You will probably want to set up your own channel and join it before you type /load trivia as the script will only operate in the channel that was active when it was loaded.
