Welcome to BumperCar 2.0! The least obtrusive, best designed, and most powerful tool for helping you manage your children's Internet experience.

After this page, you will be asked to read the BumperCar 2.0 license, and then enter your Mac's password (authentication) twice. This will only happen the first time you run BumperCar 2.0.

Once BumperCar 2.0 is installed, you will be taken directly to the Safety Settings dialog. With the aid of the manual and built-in help, please explore BumperCar 2.0's features and configure it to suit your specific needs.

Please do read the manual -- BumperCar 2.0 is a tool, not a replacement for adult oversight, and knowing how to use it will make it much more effective.
