Important note for users who have installed RapidWeaver before.
To see all the new themes in the latest version of RapidWeaver you will need to remove your old RapidWeaver support folder before launching.

The support folder can be found in your home directory at Library/Application Support/RapidWeaver (delete this folder)

For more help and information on using this app go to the help menu within RapidWeaver.

Creating Themes
For help on installing and creating themes go to the help menu within RapidWeaver.

You can also find more help and other 3rd Party themes on our online forum at:
