SaveHollywood 1.6.1

SaveHollywood is a Screen Saver module for Mac OS X.

It can play QuickTime files: moovies or flash animation. You can select to play a selection of files and directories, on every screen or not, randomy or not, scaled or not, etc...

Requirements:

Mac OS X 10.0 and later.

Installation:

Drag the File named **SaveHollywood.saver** to the **Screen Savers** folder located in the **Library** folder. This will alllow access to this Screen Saver to every user.

If you wish you can drag the file **SaveHollywood.saver** to the **Screen Savers** located in your **Home Library** folder (you may need to create the **Screen Savers** folder).

Localizations included:

• English
• French
• Japanese (made by Kaori Saegusa)
• Spanish (fixed by Pablo Altés)
• Italian (made by Andrea Baron)
• Dutch (made by Hugo W. van Rhijn)
• Swedish (made by nitro)
• German (made by Alexander Klar)
• Czech (made by Rudolf Bock)

If you want to provide an additional localization or provide correction for the Spanish one, feel free to send the localized resources to s.sudre@free.fr

Version History:

Version 1.6.1:

• New: Czech localization (Thanks to Rudolf Bock)
• Enh: The default movie is now the Mac OS X SUA introduction movie for Mac OS X >= 10.2

Version 1.6:

• New: German localization (Thanks to Alexander Klar)
• New: The volume can be adjusted (from 0% to 200%)
• Enh: Cleaner User Interface

Version 1.5.3:

• New: Fixed Spanish localization (Thanks to Pablo Altés).
• New: Complete Japanese localization of 1.5.1 labels.
• New: Switch to a BSD license for both the application and source code.
• Fix: Fix a memory leak (thanks to E. Stein)
• Fix: Remove a flick when the screen saver is started.
• Enh: The list of files has been updated from a cosmetic point of view.

Version 1.5.1:

• New: You can drop files or folders in he Movie list.
• New: Swedish localization (Thanks to nitro).
• New: Complete Japanese localization of 1.5.1 labels.

Version 1.5:

• New: Movies are now organized as a playlist.
• New: Dutch localization (Thanks to Hugo W. van Rhijn).
• GUI fix: Minor case letters fixes.

Version 1.4:

• New: You can now play movies in random order.
• New: Italian localization (Thanks to Andrea Baron).
• Bug fix: The mute issue with directory of files is fixed.
• Bug fix: The last file of a directory was played twice, this is now fixed.

Version 1.3.1:

•   New: You can now play the movie on the main screen only (if you have multiple monitors).
•   The ScreenSaver.framework random APIs are now used for the random mode.

Version 1.3:

• New: Japanese localization (Thanks to Kaori Saegusa).
• Bug fix: The menu bar was still displayed when a directory of animations was selected.
• Bug fix: the sound problem related to random positioning is now fixed (Thanks to Paul R. for the report).

Version 1.2.2:

• Bug fix: When you close the Configuration Dialog, the Movie sound is now correctly set.
• French and Spanish localization now available.

Version 1.2.1:

• Mac OX 10.1 compatibility : Fix for the Window level problem.
Thanks to Matt for the report and thanks to Mike for the workaround.

Version 1.2:

• Moovies can now be randomly placed on the screen.
• Little modification to the GUI.

Version 1.1.1:

• The soundtrack is only played on the Main Display.
• An animation from the Mac OS X SetUp Assistant is now used as the default animation.
• The source code is available now.

Version 1.1:

• You can now select multiple files and/or directories.

Version 1.0.1:

• Fix for the bug which prevented directory modified with Mac OS X to be used (the problem was the .DS_Store file).
• As a matter of fact, this improves the software by skipping files not compatible with QuickTime.

Version 1.0:

• First release
