

The *MacAddict* Ultimate How-To Collection

Welcome to The *MacAddict* Ultimate How-To Collection! This CD contains over two dozen of the latest and greatest articles from *MacAddict*'s popular—and immensely useful—How-To series. As an added bonus, we also provide you with the applications you need to accomplish these feats of techno wizardry, as well as all the tutorial files and examples you need.

Dig in, and raise your status from Mac addict to Mac guru!

The Ultimate How-To Collection includes:

1. Add Automated Functions to Excel
2. Broadcast Your Own News Feed
3. Build Your Own Music Maker
4. Build Your Own Web Site
5. Clean Up Your Mac
6. Control Your Mac with Your Voice
7. Create a Super Video CD
8. Create Photo-Realistic Shadows
9. Digitize Vinyl and Audiocassettes
10. FTP for Free
11. Get Better Black and Whites
12. Give Clock a Face-Lift
13. Go Old School with Mac OS X
14. Make AppleScript Do Your Dirty Work
15. Make Widgets with Konfabulator
16. Manage Multiple Accounts in Entourage
17. Overdub Flubs in iMovie
18. Personalize Your Form Letters
19. Pimp Out Your G5
20. Protect Your Privacy with AppleScript
21. Replace an iPod Battery
22. Rip Sound Tracks from Your DVDs
23. Run Unix Apps in Mac OS X
24. Sneak Your Mac onto a Windows Network
25. Trash Locked Files and Directories

As you work your way through these tutorials, please keep the following in mind:

- Some of the applications we include on this CD have version numbers that are different from those described in the How-To tutorials. No problem—this just means that the application has been updated since the tutorial originally went to press. In fact, you may want to visit the Web site of the company that created the application to find out if there's an ever more recent version that has been released since this CD was created.
- The Adobe Photoshop CS tryout appears on this Disc. Some of the tutorials may list Photoshop 7, Photoshop Elements, or ACD Systems Canvas as being included on the Disc—they're not, but don't worry. Photoshop CS will allow you to accomplish any tutorial that says it requires an image-editing app. Please note that some menu navigation may differ.
- Some of the tutorials require Apple applications, but Apple prefers to distribute those themselves from their Web site. Many of these applications are freely downloadable.
- Some of the apps that are listed as being included "On the Disc" are, in fact, absent for various author or developer reasons. If a software title does not appear within the article's folder, you can download the latest version from the manufacturing company's Web site—we list all company URLs in each document.

Enjoy yourself! And welcome to the *MacAddict* family.
