About this Demo

This entire demo was written in Visual Basic using the FXTools/VB custom controls. ImageFX encourages you to distribute the FXTools/VB Professional Demo as long as all of the files required by the demo are not renamed or altered in any way.

ImageFX is committed to developing outstanding multimedia tools for Visual Basic. If you like this demo, we encourage you to tell your co-workers, associates and fellow Visual Basic friends about FXTools/VB. If you have local BBS's, we also encourage you to place this demo on them.

FXTools/VB capabilities for Visual Basic are unmatched at any price.

Have fun with Visual Basic. Join the multimedia development revolution today.

Jerry Isenga
President, ImageFX
