## Visual Basic Programmer's Journal Back Issue Table of Contents

**April 1995 VOL. 5, No. 4**

### FEATURES

#### ***Surfing The Internet by Carl Franklin***

Use VB and Internet-specific VBXs and techniques to build apps that get information from Gopher Information Servers. Also find VB-related information on the Internet.

#### ***Manage The Client/Server Monster by Mark Streger***

Build in features that are essential to managing your complex client/server networks and applications.

#### ***Apply State Machine Theory To Data Access by Ibrahim Malluf***

By using state machines for your database access applications, you can make your Visual Basic applications more feature-laden and reliable.

#### ***The Ten Most Obscure Commands by Ward Hitt***

Expand your Visual Basic vocabulary. Here are ten commands that most people don't use often, but are useful for everyday programmers.

#### ***Architecting Solid Software by Deborah Kurata***

Instead of adding code to a prototype, step back a little and build a solid foundation for your app using object-oriented techniques.

### COLUMNS

#### ***Database Design by Andrew Brust***

Unleash undocumented Access.

#### ***OLE Expert by Christine Solomon***

Leverage Access and Excel with OLE.

#### ***Visual Programming by Richard Hale Shaw***

Build your first OCX.

#### ***Windows Programming by Sam Patterson***

Explosive functions.

#### ***Getting Started with VBA by Chris Barlow***

Access your enterprise database.

#### ***Programming Techniques by Craig Leach***

Is disk compression active.

#### ***Q&A by Carl Franklin***

Use TimerCount for real-time accuracy.

### DEPARTMENTS

#### ***Publisher's Note by James E. Fawcette***

#### ***Letters to the Editor***

#### ***Basic Heroes by Robert W. Scoble***

#### ***Crossword Puzzle***

#### ***Guest Opinion by Alan Cooper***

# VB-CD Quarterly Limited Edition

**May 1995 VOL. 5, No. 5**

## FEATURES

### **Create Great Reports *by Phil Weber***

Whether you exploit third-party tools or write the code yourself, you can transform plain ol' data into attractive onscreen or printed reports.

### **Speed Sorting With Seven Algorithms *by Deepak Agrawal***

Picking the right sorting algorithm can make the difference between an app that screams and an app that oinks. Here's how seven sorts compare.

### **Build PerfectOffice Apps *by Steve Mann***

VB programmers had a tough time programming the predecessor to Novell's PerfectOffice, but now you can control PerfectOffice through its new VBX interface.

### **Diagnosing Sick Screen Syndrome *by Ken Schiff***

With VB it is easy to create nauseous user interfaces. Here's how to treat 12 deadly developer's diseases before they infect your user.

### **Controlling Pointer Appearance *by Chris Adler***

Shrewdly setting the MousePointer property helps you improve the usability and perceived speed of your application.

## COLUMNS

### **Database Design *by Roger Jennings***

Track Client/Server Cost-performance.

### **OLE Expert *by Christine Solomon***

Manage and Merge Excel data.

### **Visual Programming *by Richard Hale Shaw***

Get Started with ControlWizard.

### **Windows Programming *by Jonathan Zuck***

Uncommon Dialogs.

### **Getting Started with VBA *by Chris Barlow***

Take a Voyage Through the Range Object.

### **Programming Techniques *by Jonathan Wood***

Hide the sludge.

### **Q&A *by Carl Franklin***

Subclass to Insert Items Into the System Menu.

## DEPARTMENTS

### **Publisher's Note *by James E. Fawcette***

### **Letters to the Editor**

### **Basic Heroes *by Robert W. Scoble***

### **Crossword Puzzle**

### **Guest Opinion *by Roger Jennings***

# VB-CD Quarterly Limited Edition

**July 1995 Vol. 5, No. 7**

## FEATURES

### **Spring the Trap On GPFs by Michiel de Bruijn**

“Out of Memory”! “Syntax Error”! “File Not Found”! Persistent general protection faults point to bugs in your code. Use the author’s tips along with a free VBX to squash the problems.

### **Create Fast Windows Animation by Robert Stewart**

Now you can add a little gravy to your meat and potatoes. A new API set from Microsoft enables VB programmers to implement high-performance graphics to spice up their applications.

### **Devise A Configuration Management Plan by Jerry Kurata**

Leaving out important updates or overwriting current files can be devastating. Coming up with a good configuration management strategy can shield you from such disasters.

### **Build Smart Documents with Acorbat and OLE by Bob Cristello**

Get smart: don’t leave a paper trail. OLE Automation and Adobe Acrobat enable programmers to use Visual Basic to easily convert paper-based documents into digital files that users can interact with.

## COLUMNS

### **Database Design by Andrew J. Brust**

Take the SQL Server Plunge.

### **OLE Expert by Roger Jennings**

Say OLE! with MultiMedia.

### **Visual Programming by Richard Hale Shaw**

Looking Inside the ControlWizard.

### **Windows Programming by Sam Patterson**

Registration Required.

### **Getting Started with VBA by Chris Barlow**

Drive Word from Excel.

### **Programming Techniques by Karl E. Peterson**

Creeping Version-Itis.

### **Q & A by Carl Franklin**

See Through Bitmap Backgrounds.

## DEPARTMENTS

### **Publisher’s Note by James E. Fawcette**

### **Letters to the Editor**

### **Basic Heroes by Robert W. Scoble**

### **Crossword Puzzle**

### **Guest Opinion by Roger Jennings**
