Getting Custom Controls Written

Description

This custom control for Visual Basic is a command button that has both text and a picture on it. The picture can be scaled and placed above, below, to the right, or to the left of the text. The text may be multiple lines.

File Name

PICBTN1.VBX

Object Type

MabryPictureButton

Usage Note The Caption property can contain multiple lines of text. You can delimit each line with either a carriage return (Chr(13)) or a vertical bar (Chr(124)). Using the vertical bar will allow you to specify multiple lines of text at design-time.

Distribution Note When you develop and distribute an application that uses PicBtn, you should install the file PICBTN1.VBX into the users Windows SYSTEM directory. PicBtn has version information built into it. So, during installation, you should ensure that you are not overwriting a newer version of PicBtn.

Properties

All of the properties that apply to this control are in this table. Properties that have special meaning for this control or that only apply to this control are marked with an asterisk (*).

<u>*AutoSize</u>	<u>FontUnderline</u>	<u>*PictureDown</u>
<u>BackColor</u>	<u>*Gap</u>	<u>*PictureUp</u>
<u>Caption</u>	<u>Height</u>	<u>*Placement</u>
<u>DragIcon</u>	<u>HelpContextID</u>	<u>TabIndex</u>
<u>DragMode</u>	<u>hWnd</u>	<u>TabStop</u>
<u>Enabled</u>	<u>Index</u>	<u>Tag</u>
<u>FontBold</u>	<u>Left</u>	<u>Top</u>
<u>FontItalic</u>	<u>*Mode</u>	<u>*Value</u>
<u>FontName</u>	<u>MousePointer</u>	<u>Visible</u>
<u>FontSize</u>	<u>Name</u>	<u>Width</u>
<u>FontStrikethru</u>	<u>Parent</u>	

Value is the default value for the control.

Events

All of the events that apply to this control are in this table. Events that have special meaning for this control or that only apply to this control are marked with an asterisk (*).

[Click](#)

[DragDrop](#)

[DragOver](#)

[GotFocus](#)

[KeyDown](#)

[KeyPress](#)

[KeyUp](#)

[LostFocus](#)

[MouseDown](#)

[MouseMove](#)

[MouseUp](#)

AutoSize Property

[See Also](#)

[Example](#)

Description

Determines whether the bitmap is automatically resized to fit the button.

Usage

[*form.*][*control.*]**BevelInner**[= {**True**|**False**}]

Remarks

If this property is set to True, the bitmap(s) used for the button is automatically resized to fit the button. All three supported picture types may be re-sized.

Data Type

Integer (boolean)

See Also

Properties:

Gap

PictureDown

PictureUp

Placement

ButtonColor Property

Description

Determines the color of the surface of the button.

Usage

*[form.]***ButtonColor**[= *color*]

Remarks

This property determines the color of the surface of the button. It defaults to light gray.

Data Type

Color

Gap Property

[See Also](#)

[Example](#)

Description

Determines the distance between the edges, the bitmap, and the text.

Usage

*[form.]***Gap** [= *integer*]

Remarks

The value of this property determines the minimum distance between the edge and the bitmap. It also determines the distance between the bitmap and the text. This property is expressed in pixels. It defaults to 6.

Data Type

Integer

See Also

Properties:

[AutoSize](#)

[PictureDown](#)

[PictureUp](#)

[Placement](#)

Mode Property

[See Also](#)

Description

Determines the way the button rises and lowers.

Usage

[*form.*][*control.*]**Mode**[= *integer*]

Remarks

This property specifies how the button acts. PicBtn can act like a normal button or a toggle button (for tool bars, etc.). This property may be one of these values:

Value	Description
0	Normal (default) - PicBtn depresses when the button is pressed and rises when the button is released.
1	Toggle - the button depresses on the first click, and rises on the second click. PicBtn will also change state via the Value property.
2	Manual - PicBtn only changes state when set via the Value property

Data Type

Integer (enumerated)

See Also

Properties:

Value

PictureDown and PictureUp Properties

[See Also](#)

Description

Determines the picture used for the control.

Usage

[form.][control.]PictureDown [= *picture*]

[form.][control.]PictureUp [= *picture*]

Remarks

The value of these properties determine the pictures that are displayed on the button. PictureUp is the bitmap that's displayed when the button is up; PictureDown is displayed when the button is down.

If PictureDown is not set, PictureUp is used. If neither are set, the button doesn't display bitmaps at all (i.e., it is text-only).

These properties can be bitmaps, icons, or Windows meta files. PicBtn will stretch or shrink any of these, if needed.

Data Type

Picture

Properties:

[AutoSize](#)

[Gap](#)

[Placement](#)

Placement Property

[See Also](#)

[Example](#)

Description

Determines the position of the picture relative to the text.

Usage

[*form.*][*control.*]**Placement**[= *integer*]

Remarks

The value of this property determines the where the bitmap is in relation to the text. This property is ignored if [PictureDown](#) is not set.

This property may be one of four values:

Value	Description
0	Left of text (default)
1	Above text
2	Right of text
3	Below text

Data Type

Integer (enumerated)

See Also

Properties:

[AutoSize](#)

[Gap](#)

[PictureDown](#)

[PictureUp](#)

Value Property

[See Also](#)

Description

Determines the state of the control (up or down).

Usage

[*form.*][*control.*]**Value**[= {**True**|**False**}]

Remarks

This property is True when the button is depressed and False when the button is raised.

When Mode is zero (Normal), the Click event is fired when this property is set to non-zero.

In all other modes, the Click event is fired whenever this property is changed.

Data Type

Integer (boolean)

AutoSize, Gap, and Placement Properties Example

In this example, the program will show what happens when you adjust the various visual properties. To try this example, paste the code into the Declarations section of a form that contains a horizontal scroll bar (for Gap), a check box (for AutoSize), a command button (for Placement), and a PicBtn (with the PictureUp property set to a bitmap). Press F5. Play with the various controls.

```
Sub Check1_Click ()
    PicBtn1.AutoSize = Check1.Value
End Sub

Sub Command1_Click ()
    Select Case Val(Left(Command1.Caption, 1))
        Case 0:
            Command1.Caption = "1 - Above text"
            PicBtn1.Placement = 1
        Case 1:
            Command1.Caption = "2 - Right of text"
            PicBtn1.Placement = 2
        Case 2:
            Command1.Caption = "3 - Below text"
            PicBtn1.Placement = 3
        Case 3:
            Command1.Caption = "0 - Left of text"
            PicBtn1.Placement = 0
    End Select
End Sub

Sub Form_Load ()
    Form1.Caption = "PicBtn Sample #1"

    Form1.Height = 3120
    Form1.Width = 3000

    Check1.Top = 240
    Check1.Left = 240
    Check1.Width = 1800
    Check1.Caption = "AutoSize"
    Check1.Value = 1

    HScroll1.Top = 600
    HScroll1.Left = 240
    HScroll1.Width = 1800
    HScroll1.Value = 6
    HScroll1.Min = 0
    HScroll1.Max = 20

    Command1.Top = 960
    Command1.Left = 240
    Command1.Height = 480
    Command1.Width = 1800
    Command1.Caption = "0 - Left of text"

    PicBtn1.Top = 1560
```

```
    PicBtn1.Left = 240
    PicBtn1.Width = 2400
    PicBtn1.Height = 900
End Sub

Sub HScroll11_Change ()
    PicBtn1.Gap = HScroll11.Value
End Sub
```

Registration Information

Credits

PicBtn was written by James Shields. Inquiries can be sent to 71231,2066 on CompuServe, or mabry@halcyon.com on Internet. If you must send something via U.S. Mail, the address is:

Mabry Software
Post Office Box 31926
Seattle, WA 98103-1926

Registration

You can register this program by sending \$15 (\$17 for international orders) and your address. CompuServe members may register by sending \$10 and their account number (the registered version will be E-mailed to you). CompuServe members may also register this package by going to the SWREG forum. PicBtn is registered there. PicBtns registration ID number is 3434.

For your convenience, an order form has been provided that you can print out directly from help.

Source Code and Registration

Source code (which includes a registered copy) to this control is available for \$50 (\$55 for international orders). With source code you get a registered version of the control. If you are a CompuServe member, you may get the source code in the Software Registration forum (GO SWREG) for \$45. It's registration number is 3435.

Credit Card Orders

You can order this program with Mastercard, Visa, American Express, or Discover from Public (software) Library by calling 800-242-4775 or 713-524-6394 or by FAX to 713-524-6398 or by CompuServe E-mail to 71355,470. You can also mail credit card orders to PsL at Post Office Box 35705; Houston, TX 77235-5705. THESE NUMBERS ARE FOR CREDIT CARDS ONLY.

PicBtn's ID number for this service is 11577. This is good for both the normal registered version, and the source code version.

Any questions about the status of the shipment of the order, refunds, registration options, product details, technical support, volume discounts, dealer pricing, site licenses, etc., must be directed to Mabry Software at 206-634-1443 or FAX at 206-632-0272.

To ensure that you get the latest version, PsL will notify us the day of your order and we will ship the product directly to you.
