## Compuserve Orders

### How to register through Compuserve?

- GO SWREG
- SHAREWARE REGISTRATION
- PROCEED
- REGISTRATION ID
- Enter Registration Id as noted on the Product review. (Select AUTHORS NAME instead of Registration Id and enter as name REDEI if the Registration Id is not available. A list of products that you can currently register via Compuserve will be displayed. Proceed if the product is listed.)
- Pricing and Shipping&Handling fees will be provided by Compuserve
- Send an E-mail to REDEI Enterprises (71744,3633) after you registered and submit the serial number of the registered product.

### What happens after registration?

- You will receive your Registration code via E-mail in 24 hours.
- You will receive your software via mail in a week.

## Credit card orders

### How to order?

You can order with MC, Visa, American Express or Discover from Public (software) Library by calling 800-2424-PSL or 713-524-6394 or by FAX to 713-524-6398 or by CIS E-mail to 71355,470. You can also mail credit card orders to PSL at P.O.Box 35705, Houston, TX 77235-5705.

Please note that the above numbers are for credit card orders **only**. The author of the product can NOT be reached at these numbers. Please refer to the PsL Product# when ordering.

Any questions about the status of the shipment of the order, refunds, registration options, product details, technical support, volume discounts, dealer pricing, site licenses, non-credit card orders, etc, must be directed to REDEI ENTERPRISES by mail (see the address at Mail Orders), E-mail CIS 71744,3633, fax or phone (310)832-6984.

### Credit card pricing

Credit card pricing includes the product price as noted on the product review. Add Shipping & Handling fees \$5.50 for USA, CANADA and MEXICO and \$12.00 for other countries and a transaction fee of \$8.00 per software package.

### **What happens after a credit card order?**

- Your order will be shipped to you in ten days
- You must submit the serial number of the product after you installed it directly to Redei Enterprises (please do NOT call or send to PSL). Please do it as soon as possible because otherwise your software will stop to work.
- Upon the submission of the serial number you will receive your registration code on the fastest possible way, preferably by E-mail, fax or phone

# Gardening & Landscaping Business

**GARDENING BUSINESS for Windows** is a business management software for small companies. It keeps track of customers and their orders, prices and supplier's information, material and labor requirements, buy history and cashflow. It automatically creates work orders, prints invoices and reports. It is designed for those small businesses where practically no inventory is necessary, therefore provides no inventory control. Gardening Business can be used for any small business, where the requirements are similar to gardening and landscaping.

Customized versions are available. Contact directly Redei Enterprises.

# Database Browser

**Database Browser for Windows** is an easy to use tool with full edit, query, sorting and printing capabilities. It supports Microsoft Access 1.1 and 2.0 (.MDB), dBASE III, dBASE IV, FoxPro 2.0 and FoxPro 2.5 (.DBF), Paradox (.DB) and Btrieve (.DDF and .DAT). Records are displayed in a scrollable grid in which columns may be moved and resized with the mouse. It provides QBE (query by example) form that makes record query easy. Fields which may contain a large amount of text (like Memo fields) may be viewed and edited in a separate window using a Zoom button. Database Browser can be used in LAN (Local Area Network). Reports can be printed on the printer, on the Clipboard and in text file. Masking for numeric fields. Calculated columns. Column totals. Remote usage from other Windows applications.

Price: **\$49.50**

# Money Organizer

**Money Organizer for Windows** does what it says. It handles an unlimited number of Checkings, Savings, Credit Cards, Loan and personal accounts. It allows complete transactions between accounts. It provides budgeting and maintains all transactions by budget categories. It creates reports, compares the actual transactions with the budgets and graphs the results. Reports and graphs can be printed. Graphs can also be copied to the Clipboard and transferred to other software, such as Microsoft Words. Reports can be written in any language supported by the Windows Version and Configuration, including those writing in a right to left direction, such as Hebrew.

The bonus features include the storage of personal data, such as Birthdays, Anniversary dates and phone directory. Money Organizer reminds you at things you need to do. If you have a Modem it dials phone numbers. It also can page your or somebody else's beeper. The data can be secured. Using the password protection no one else can access your financial notes.

# Action Process Automator for Windows

**ACTION for Windows** is a process automator. Once the computer is turned on and Windows is loaded ACTION can be started from the StartUp Group. From this moment ACTION takes charge over predetermined tasks, triggering them whenever they are scheduled to occur.

The use of ACTION is quite simple. When it is loaded, the icon appears, and ACTION is in business. Just double click the icon to add, edit or view scheduled actions.

You can schedule a series of actions leaving long enough time between them to finish the prior one before the next starts. ACTION can copy, rename and move files and directories. It can start an application with command line parameters. ACTION uses other utilities. It can play a pre-recorded Microsoft Windows Recorder macro. It can compress and decompress PKZIP 2.04 compatible archives using ZipServer. It can attach a Network Server and map a Network drive. ACTION can exit or restart Windows and also can reboot the computer.

Price: **\$79.50**

# ZipServer for Windows

**ZipServer for Windows** is a simple to use utility and programming tool for creating, updating, viewing, commenting and extracting PKZIP 2.04g compatible archives by loading ZipServer as a visible Windows application or using it remotely and invisibly from another Windows application. ZipServer can produce and extract Multi Volume archives and be used as a tool for backup. Applications can be launched directly from the archive with ZipServer.

ZipServer is a Visual Basic program using Compression Plus. ZipServer itself is also a tool for Visual Basic programmers, providing either DDE or DLL connection. As a DDE Server, ZipServer seamless bound to the client, that can be any application that includes Application Visual Basic. The ZipServer installation package includes sample source codes for Visual Basic 3.0 and for MsWord 6.0 that demonstrate how to access the ZipServer. The sample codes are also helpful for users who want to link the ZipServer to MSEXCEL or MSACCESS. The Visual Basic sample codes also explain the use of the ZIPSERV.DLL via API calls.
