

Creativision Graphics

We create computer graphics for software, electronic documents as well as designs for company logos and advertising materials.

Software Developers

We can help you improve the quality of the graphics in your user interface. We create graphics in 16-color, 256-color as well as 24-bit images. Most applications need 16-color images, particularly for interface elements like icons, toolbars, tool palettes and splash windows. Sixteen color images are also low on resources. Ideally a 16-color image should be crafted well enough that the users never notice. That's where we come in! We are skilled at creating bitmaps for any program in most any format you need including: BMP, DIB, RLE, WMF, GIF, TIFF, JPG and PCX. Check out our portfolio for some samples!

Electronic Publishers

We create images with modern tools. We can work with video stills and scanned images. We can help you create the perfect look for your documents including stylish and intuitive user interfaces. We can create 24-bit images or convert to 256-color for limited space. Let us help you make your publications stand out!

Company Logos and Product Trademarks

Give us information about your product or company and we'll work with you to create a logo or trademark that best represents you or your product. We have created several logos for internal use and for clients like yourself. We can help you improve your business image!

Business Artwork

We use MICROGRAFX Designer and COREL to create brochures and other conventional paper publications. We can integrate photographs and your text into an effective advertising piece to your specifications! We provide electronic output in many formats including Encapsulated Postscript, TIFF, CGM, HP-PGL and more! We can also create graphics for inclusion in your own document templates or FAX cover sheets. We can even recommend other services for duplication of your completed materials.

Get More Information

Phone

We're available by phone Monday through Friday from 9am-5pm Central Time. When calling, ask for the Graphics group at **817-656-5970**. We can also accept VISA and Mastercard payments on job invoices over the phone.

FAX

Our dedicated FAX line is up 24 hours a day, seven days a week at **817-656-7794**. While we work on concepts, we can FAX ideas and graphics to you for feedback. Additionally, we can FAX invoices to you after job completion.

CompuServe

Send all compuserve email to David Balmer at **70404,3014**. By attaching files to email, we can quickly send graphics to you for your feedback. This really helps speed the process.

America Online

Send email to **CvpSupport**. As with CompuServe, we can attach graphics to email to make the process smoother.

Internet Email

Send internet email to **cvpsupport@aol.com**

"We hope you've found ways to put some of the icons in the pack to use. We can create custom icons and splash screens to give your program a unique look. We look forward to hearing about your next project!"
