

Sliding Doors

Overlapping, sliding doors, also known as by-passing doors, are popular for closets. These space savers are inexpensive and easy to install. They come in louvered, paneled or flush styles. Keep in mind that you can only open one half of your closet at any time.

Sliding doors with built-in mirrors are a nice feature in bedrooms. The mirrors make a small room seem larger. Their extra weight means they must be installed in sturdy metal frames like sliding glass doors.
