Cardfile

Lets you file information and pictures on a set of index cards. You can use Cardfile to keep track of names, addresses, phone numbers, directions, or anything else you want quick access to. You can also add pictures to the cards, and use a card to dial a phone number if you have a Hayes or Hayes-compatible modem.

Cardfile has two views--Card and List. In Card view, you see a file of cards. In List view, you see a list of the cards' index lines.

application Control-menu
